a The figures for Mexico include coin and bullion.

## II.—COMMERCIAL AGENCIES.

The following Canadian Commercial Agents (whose addresses are given) will answer correspondence relative to commercial and trade matters, and give information to those interested as to local trade requirements in the districts they represent.

Such reports of general interest as have been received from them since the publication of the last monthly report of this department are appended.

J. S. Larke, Sydney, N.S.W., agent for Australasia.

James G. Jardine, Cape Town, South Africa, agent for South Africa.

G. Eustace Burke, Kingston, Jamaica, agent for Jamaica.

Robert Bryson, St. John, Antigua, agent for Antigua, Montserrat and Dominica.

S. L. Horsford, St. Kitts, agent for St. Kitts, Nevis and Virgin Islands.

Edgar Tripp, Port of Spain, Trinidad, agent for Trinidad and Tobago.

C. E. Sontum, Christiana, Norway, agent for Norway, Sweden and Denmark.

A. D. Campbell, Buenos Ayres, agent for Argentine Republic and Uruguay.

A. Poindron, 10 Rue de Rome, Paris, agent for France.

In addition to their other duties, the undermentioned Canadian agents will answer inquiries relative to trade matters, and their services are available in furthering the interests of Canadian traders :—

J. G. Colmer, 17 Victoria Street, London, S.W., England.

Harrison Watson, Curator for Canadian Section, Imperial Institute, London, England.

G. H. Mitchell, 15 Water Street, Liverpool, England.

H. M. Murray, 52 St. Enoch Square, Glasgow, Scotland.

W. L. Griffith, Western Mail Buildings, Cardiff, South Wales.

C. R. Devlin, 14 Westmoreland Street, Dublin, Ireland.

D. Treau De Cœli, 75 Marché St. Jacques, Antwerp, Belgium.

### (A.)—AUSTRALASIA.

#### REPORT OF COMMERCIAL AGENT.

(*Mr. J. S. Larke.*)

SYDNEY, N.S.W., December 1, 1902.

The Honourable

The Minister of Trade and Commerce,  
Ottawa.

SIR,—Useful showers have fallen on the coastal and portions of the central districts of New South Wales and over a portion of the coastal district of Queensland. They promote the growth of grass but have little effect upon the harvest. The official estimate for New South Wales is that 1,561,704 acres were sown to wheat, being 143,000 less than sown in 1901. Of these more than half was ruined by the drought. Nearly a

third of the remainder was cut for hay, leaving 476,000 acres to be cut for wheat. No statement is made of the probable yield but the general estimate is about four million bushels. This is eight million bushels below the harvest of last year. The decline in the shipments of wool is pronounced and it is feared that exports of the products of New South Wales this year will be over twenty per cent below those of last year. Queensland will be in even worse case but the other States will not be so seriously affected. Western Australia and Tasmania will have a better trade than last year. The probabilities are, therefore, that the requirements of wheat and flour will be in excess of my estimate of previous reports.

The requirements of other products cannot be foreseen as so much will depend on the summer and autumn rains and the crop of New Zealand which will be known in March. This market will in the meantime take all that Canada is likely to be able to send.

VICTORIA.

The imports from Canada as given in the Victorian returns were :—

| 1899.   | 1900.   | 1901.   |
|---------|---------|---------|
| £19,380 | £56,789 | £95,672 |

The details of the trade as given are :—

|                               | 1901.   |
|-------------------------------|---------|
| Bicycles.....                 | £ 5,895 |
| Balls .....                   | 2       |
| Boots and shoes.....          | 377     |
| Furniture .....               | 1,710   |
| Machinery.....                | 250     |
| Implements—Agricultural ..... | 28,158  |
| Plated ware.....              | 60      |
| Stationery.....               | 16      |
| Deals.. .....                 | 19,513  |
| Timber—Undressed .....        | 5,905   |
| Oregon.....                   | 28,964  |
| Pickets.....                  | 2,058   |
| Laths.....                    | 1,595   |
| Pigiron.....                  | 1,169   |

The exports to Canada were as in previous years nominal, consisting only of two items of Victorian produce, Mollases £25 and Saddlery £16.

In the imports from Canada are included items of boots, engines, manufactures of metals and wooden, on which considerable duty was paid, but neither the quantity nor value of the goods are shown.

It is a more accurate statement of the imports from Canada than the department has been able to give in former returns, but is still very imperfect owing to importers giving the United States as the country of origin for large quantities of Canadian goods of which Canada sent considerable amounts, and such articles as canned salmon, cotton piece goods, cheese, silk, ammunition, organs and pianos, and India rubber do not appear on the list of articles from Canada.

SOUTH AUSTRALIA.

The imports from Canada were :—

| 1899.         | 1900.         | 1901.    |
|---------------|---------------|----------|
| £ 19,065..... | £ 25,600..... | £ 27,832 |

The exports were nil last year, and but £50 during the previous year. The items of the imports from Canada for two years were :—

|   | 1900.   | 1901. |
|---|---------|-------|
| Apparels . . . . .                      | £ 536   |       |
| Mowers and binders . . . . .            | 2,642 £ | 73    |
| Other agricultural implements . . . . . | 4,129   | 4,049 |
| Bicycles . . . . .                      | 633     | 4,549 |
| Bicycle parts . . . . .                 |         | 151   |
| Books . . . . .                         |         | 36    |
| Boots and Shoes . . . . .               | 293     | 3     |
| Carriages . . . . .                     |         | 30    |
| Cotton . . . . .                        | 1,131   | 2,618 |
| Drapery . . . . .                       | 72      |       |

## QUEENSLAND.

As was to be expected the trade of this state shows a decline as compared with the previous year. The figures are :—

|                   | 1900.      | 1901.      |
|-------------------|------------|------------|
| Imports . . . . . | £7,184,112 | £6,376,239 |
| Exports . . . . . | 9,581,562  | 9,249,566  |

The exports of 1900 were over two million and a quarter pounds less than those of the year 1899.

The Canadian trade was :—

|                   | 1899.   | 1900.   | 1901.   |
|-------------------|---------|---------|---------|
| Imports . . . . . | £21,794 | £36,627 | £49,659 |
| Exports . . . . . | 63,186  | 1,110   | 1,476   |

The imports show a steady increase. The falling off of the exports since 1899 was due to the partial failure of the sugar crop, leaving nothing to spare beyond Australia. The Queensland returns give the detailed imports and in a separate column the place of origin, as far as possible, but as the totals of the goods credited to the places of origin is much below that of the total imports, it is clear that the former is much below the reality. The principal imports from Canada as given in the returns of the country of origin are :—

|                                   | 1900.   | 1901. |
|-----------------------------------|---------|-------|
| Agricultural implements . . . . . | £       | 1,541 |
| Machinery . . . . .               | £ 8,990 | 6,549 |
| Apparel and slops . . . . .       | 721     | 15    |

## WEST AUSTRALIA.

In a previous report I gave the trade returns of this state, showing an increase in 1901 of imports of about half a million pounds and of exports of nearly two millions over those of the previous year. The imports from Canada, though small, being only about one fifth of one per cent of the total, are increasing in value. For the last four years they were :—

|              | 1898. | 1899.  | 1900.  | 1901.   |
|--------------|-------|--------|--------|---------|
| Imports..... | £977  | £5,431 | £4,370 | £13,846 |

These imports consist almost wholly of agricultural implements, bicycles, timber and machinery, as the following details of these imports including some samples show :—

|                         |       |
|-------------------------|-------|
| Preserved fish.....     | £ 54  |
| Preserved milk.....     | 88    |
| Reapers.....            | 4,251 |
| Mining machinery.....   | 265   |
| Fish oil.....           | 2     |
| Mineral oil.....        | 1     |
| Furniture.....          | 17    |
| Sashes.....             | 107   |
| Timber.....             | 4,764 |
| Woodware.....           | 4     |
| India rubber goods..... | 47    |
| Stationery.....         | 12    |
| Bicycles.....           | 1,878 |
| Bicycle parts.....      | 2,340 |

I have previously pointed out the possibilities of Canadian trade with Western Australia. There are yearly imported over thirty million dollars worth of goods, the bulk of the lines we have not yet touched. The imports from the United States amounted to three million dollars and were more than double those of the previous year. The direct ships from New York with low freight rates are the chief cause of this rapid expansion. With similar advantages Canada could have supplied flour, meals, oats, canned fruits and vegetables, bacon and hams, plaster, timber from the Eastern provinces besides general manufactures. Under the common tariff and its prosperous developments Western Australia is the most promising field for Canadian enterprise just now.

## TASMANIA.

Though the 1901 exports of Tasmania were considerably in advance of those of the previous year, the imports were slightly less. The figures are :—

|              | 1900.      | 1901.       |
|--------------|------------|-------------|
| Imports..... | £2,073,657 | £ 1,965,199 |
| Exports..... | 2,610,617  | 2,945,757   |

The return from this state makes no note of goods from Canada, everything from the Western continent being lumped as from America. This island is to-day the most prosperous part of the commonwealth. Last year it had a good season and the misfortune of its larger neighbours gave its producers high prices for their products. Its exports have doubled in five years and its agricultural, mining and industrial resources are capable of much greater development.

An examination of the list of articles from Canada sold in the several States will show great variations. A part is explained by the difference that existed in the tariffs of the several states before federation, another fact is attributable to the freight facilities but a good deal is accounted for in the difference in the agents employed.

It will be noted that a large number of items are sold as samples one year but no sales appear in the following. This is due in part to the fact that the trade was found not to be profitable to the exporter or to the agent here. In the latter case it illustrates the necessity of an export company with sufficient capital to purchase the goods outright and to keep them persistently in the market until they have become a fixture in it. Many lines are unprofitable to the manufacturer because of the present high cost of selling them. A company handling many lines and large quantities would have costs of carriage and handling reduced to a minimum and the business would be made profitable.

#### CAUTION.

I must continue to urge upon Canadian exporters the necessity of a clearly defined agreement with an agent and closely adhering to it. An Australian while recently in Canada made an agreement to handle a line of goods the terms being, as he advises me, a draft at ninety days. The first shipment arrived here with a sight draft attached to the documents. The consignee has refused to accept the goods under these conditions and they now lie here at expense which the consignor will doubtless have to bear. I endeavoured to get the consignee to accept the goods and claim the discount for prompt payment but I did not succeed. If the shippers had advised me and given me the power to deal with the goods in such an emergency, I could have saved him some loss, but as it is I am powerless.

#### THE PRODUCE TRADE.

Our trade is now hampered for lack of shipping. In my last report I stated that United States flour *via* New York was taking the place of Canadian *via* Vancouver. One firm advertises that it has placed orders for twelve thousand tons of flour from Manitoba wheat. Of this amount less than two thousand will be ground in a Canadian mill and shipped from a Canadian port. The remainder will be ground in Minneapolis and shipped from New York. Even at the present rates it is impossible to get produce bought in Vancouver here by the regular line, and sales in part or whole have had to be cancelled in consequence. With this state of things there is the strange anomaly that I am advised that it is not possible to get sufficient freight at Vancouver to put on an extra steamer. Traders and charterers appear to be mutually waiting upon one another, and in the meantime Canadian trade is suffering the loss. There seems to be no difficulty in getting both steamers and sailers from the United States Pacific ports. The United States organization was prepared for the emergency, ours was not.

Just now the trade is upset by the resolution adopted by the New South Wales Parliament passing a resolution asking the federal government to suspend the duties on food products in order to relieve the suffering from the drought. In case the commonwealth government should not assent to this, and it is unlikely that it will, there is a possibility that the New South Wales government may itself pay three-fourths or the whole of the duty. This is more probable than the other proposition, but there are difficulties constitutional and practical in the way of this course. In the meantime some buying to arrive is suspended and is alleged that orders for loading at New York have been cancelled.

A small lot of Canadian oats arrived by the last steamer and was sold in bond at sixty-two cents per bushel of forty pounds. It was not a first class sample, being thin, a sort not liked in the market. Four cents more were offered if the lot equalled a small lot sent previously, but it was considerably below it. There was a shrinkage in the weight as compared with that stated in the invoice but as they were new this was not unexpected.

I received a cable on the evening of the 26th. 'Cable present price oats duty paid. Stating weight bushel also probable demand agricult.' I intended to reply 'sixty-two C. I. F., forty pounds. Strong till March.' This was to give what I considered the quality of Canadian oats likely to be shipped would net the exporter that is after all commissions and expenses had been paid. Unfortunately in the hurry of copying to get it away before the office was closed C. I. F., was omitted, and the next day I cabled in the terms of the inquiry 'eighty-five forty pounds.'

The variation in oats produces a great variation in the price. As I write the price from the wholesale to the retail trade is quoted 3s. 4d. to 3s. 10d. per bushel, the higher figure being for a good milling sample. The Canadian exporter would sell to the wholesale merchant at about two or three pence per bushel less, and he would require to pay a commission to the commission house of five per cent which commission would cover the cost of weighing and superintending of delivery as well as the charge for selling.

As I have pointed out there is a difficulty in advising as to the future of the market. There is to my mind not much doubt as to the future of wheat and flour. There is a wide difference in the views of authorities as to the amount Australia must import. One advises that importing is already overdone, another that no more will be required for six months. Another publishes that the equivalent of over sixteen million bushels of wheat will be required. If as alleged that three million bushels have been placed, I estimate that more than twice the quantity will be required before the next harvest. How much will come from Canada will depend upon the steps taken by Canada to secure the trade. Just now it looks as if Canada will get the jackal's and not the lion's share as it ought.

With regard to oats, the future is more difficult to foresee as it depends upon the rains and the New Zealand crop. If rains should come and bring on the Maize and Lucerne and make good pastures, the demand for oats will decrease greatly in three months. Therefore, I added firm until March.

Some potatoes came by the *Moana*. Those cased came in fine condition and brought top prices. Those in bags were from fair to good. Those shipped to Brisbane were refused a landing, as I advised would be the case in my last report. They were brought here. The market was not so good as it would have been in Brisbane. The price has fallen below the possibility of export from Canada.

I have the honour, to be,

Your obedient servant,

J. S. LARKE.

## (B.) SOUTH AFRICA

## REPORT OF COMMERCIAL AGENT

(Mr. J. G. Jardine)

22 AND 23 HUGUENOT BUILDINGS,

QUEEN VICTORIA STREET,

CAPE TOWN, Nov, 20, 1902.

The Honourable

The Minister of Trade and Commerce,  
Ottawa, Canada.

SIR,—Three matters of interest and importance to Canadian exporters to South Africa have occurred since last I had the honour of addressing you,—namely, the adoption of the amended Custom's Tariff of the Transvaal, (an official copy of which was mailed to the department a few weeks ago); the arrival on the 18th instant of the ss. *Ontarian*, the first of the direct Canadian Line of Steamers to South Africa, with a full cargo of food products and manufactures; and, the first meeting for several years at Kimberley of the Associated Chambers of Commerce, comprising delegations of business men from nearly every quarter of the continent.

## NOTE OF WARNING.

The president, (a leading importer of Cape Town) in his opening address referred to the inflation of trade in South Africa on account of war expenditure and the expenditure on repatriation and similar objects. He throws out a note of warning by telling his hearers 'that business in South Africa is not on so sound a basis as could be desired.' 'A country must eventually come down to the level of the ordinary individual and pay for what it buys by what it produces, and that is what South Africa is not doing at present as shown by the fact that during the years 1900, 1901 and for the ten months of 1902, South Africa imports through ports of Cape Colony, Durban, and Delagoa Bay amounted to £99,398,000, and the exports for the same period to only £36,050,000 or taking the imports for the ten months of 1902, which total up to £38,642,000, and exports for the same time to only £15,083,000.'

The principal reason for calling together this congress of business men was first and foremost to consider the advisability of the various colonies of South Africa entering into a new custom's union and also to include, if possible, the Portuguese Province of Mozambique, with its port at Delagoa Bay.

## PRESENT CUSTOMS UNION.

In 1889 the present custom's union was initiated, the farming community having the majority of representatives in the legislatures of the several colonies, laid heavy protective duties on bread stuffs and other food products, averaging 30 p. c. with the result that living expenses are perhaps higher in South Africa than in any other part of the world, and as the growth of cereals has steadily fallen off since 1892, the growth of wheat to-day in South Africa will not sustain its population for more than one hundred days out of the three hundred and sixty-five, so that this heavy tax on the necessaries of life is not only burdensome to the large body of consumers, but has not proved to be any real benefit to the farming class generally, hence it is expected the Dutch, in whose interest the tariff was originally framed, will consent to a revised custom's union and a tariff framed on the lines of the one now in force in the Transvaal.

## FAIR PLAY TARIFF.

The various speakers at the convention, just closed at Kimberley, including delegates speaking both languages, are evidently agreed that a 'fair play tariff' in the interests of the whole of South Africa must first be assured before a federation of the colonies to embrace a United South Africa can take place. The want of an adequate supply of rolling stock on all the railways is troubling the commercial community very seriously at present. Building operations on a large scale are projected in the Transvaal and other inland colonies, but everything is almost at a standstill because enormous quantities of building materials and other supplies are still at the coast ports awaiting shipment to the interior. It will be six months before the congestion is fully relieved, although it must be said in fairness to the military and railway authorities that they have done their best under very trying circumstances, and now that hundreds of thousands of Boers, British soldiers and refugees have mostly returned to their homes, the long suffering civilian engaged in commercial pursuits should now have his innings.

## RAILWAY STATISTICS.

It may be of interest to Canadian railway supply companies and others to note that at the present time there are 5,895 miles of narrow gauge railway completed and being worked in South Africa, made up as follows:—Cape Colony 2,628, Natal 612, Orange River Colony 466, Transvaal 957, Rhodesia 1252, and many other extensions are in process of building. Rolling stock, rails, &c., running into the millions will be required in the near future to replenish wear and tear and destruction caused by the war and the probability of a large increase of traffic. I am pleased to learn that one large engine company in Canada is turning its attention to South Africa and some Canadian car companies are doing likewise.

## IMPORTS INTO SOUTH AFRICA.

The imports into South Africa in 1900 were £23,700,115; and in 1901 were £31,595,335; showing an advance of nearly £8,000,000 over 1900; and for the ten months of 1902, ending 31st October last, totalled £38,642,000, or an advance over the whole of the year 1901 of over £7,000,000.

The details for the South African trade for 1900 and 1901 are as follows:—

| ARTICLE.  | 1900.       | 1901.       |
|---|-------------|-------------|
| Food products and drinks.....   | £11,210,682 | £15,762,712 |
| Live stock .....  | 102,714     | 71,772      |
| Building materials.....   | 833,581     | 1,245,609   |
| Electricity.....  | 41,070      | 136,954     |
| Explosives.....   | 117,290     | 119,379     |
| Hardware of all kinds.....  | 1,070,706   | 1,270,041   |
| Household requisites, including furniture and crockery.....                       | 1,583,124   | 1,969,724   |
| Iron and steel.....   | 519,298     | 596,918     |
| Leather, and boots and shoes, &c., &c.....  | 1,421,462   | 1,394,593   |
| Agricultural, and other machinery .....   | 796,241     | 850,685     |
| Stationery, paper, and books.....   | 538,141     | 689,216     |
| Textiles.....   | 1,608,020   | 2,104,243   |
| Carriages, cycles, motors, wagons, &c.....  | 1,013,150   | 968,210     |
| Sundries, including undressed timber and musical instruments, drugs, &c., &c..... | 1,537,221   | 1,943,465   |
| Post parcels.....   | 271,084     | 520,265     |
| Government stores.....  | 1,607,785   | 2,498,983   |

## IMPORTS INTO CAPE COLONY.

Value of articles imported into Cape Colony 1901 of interest to Canada.

| ARTICLE.   | VALUE.    |
|--|-----------|
| Ale and beer.....                                | £ 221,929 |
| Wearing apparel.....                             | 925,108   |
| Bags of all sorts.....                           | 93,954    |

| Wood manufactured, other than furniture.....                    | 848    |
| Woollen goods.....  | 7,946  |

## TRADE NOTES.

The details of the Transvaal, Natal and Rhodesian imports for 1901, I am not able to give at present, not having received the official returns from their several departments.

The totals as given on another page for the whole of South Africa will give a fairly correct idea of the values of the same articles imported into the Transvaal for 1901.

## RETAIL SELLING PRICES IN CAPE TOWN

The following are the retail selling prices of certain articles of food in Cape Town at the present time. In the Transvaal and Rhodesia they are somewhat higher. It must, however, be kept in mind that a very wide margin exists in South Africa between wholesale and retail prices in all descriptions of merchandise. Rents and losses in perishable stuffs and other expenses are greater out here than in Canada, and the retail profit in consequence is more than double what a storekeeper in Canada could get.

| Article.                          | Prices. |     |    |     |              |
|-----------------------------------|---------|-----|----|-----|--------------|
| Butter, according to quality..... | 1s.     | 6d. | to | 2s. | per pound.   |
| Cheese, " " .....                 | 1       | 4   | to | 2   | "            |
| Flour, " " .....                  | 0       | 2   | to | 0   | 2½d. "       |
| Bacon, green and smoked.....      | 1       | 1   | to | 1   | 4 "          |
| Hams.....                         | 1       | 3   | to | 1   | 6 "          |
| Fresh eggs.....                   | 2       | 6   | to | 3   | 0 per dozen. |
| Cambridge sausage .....           | 0       | 0   | to | 1   | 9 per tin.   |
| Fancy sweet biscuits.....         | 1       | 6   | to | 2   | 0 per pound. |
| Canned fruits, all kinds.....     | 0       | 0   |    | 1   | 3½ per tin.  |
| Canned salmon, Alaska brand.....  | 0       | 0   |    | 0   | 8½ "         |
| " " Morton's .....                | 0       | 0   |    | 0   | 10½ "        |
| " " Cutlets.....                  | 0       | 0   |    | 1   | 0 "          |

| " kippered herring and bloater... | 0       | 0   |    | 0   | 8 "          |
| " finan haddie.....               | 0       | 0   |    | 0   | 10 "         |
| " roast turkey, chicken, or duck. | 0       | 0   |    | 1   | 8 "          |

## BUTTER TRADE.

Argentine and Siberian butters are finding their way to South Africa by every steamer, in cases of 52 and 56 pounds containing about 2 per cent of salt, and are beginning to take the place of Australian. If the butter now aboard the *Ontarian* just arrived opens up satisfactorily, the Canadian article will be largely in demand throughout South Africa.

## TRADE INQUIRIES.

I am receiving a number of inquiries for green pork, in cases, for smoking and curing here: of side, middle and roll; also pickled pigs and sheep's trotters, tongues, saveloys, and tripe, potatoes and onions, in cases. Potatoes from Canada packed in layers between brown tissue paper in 56 pound boxes arrived here in splendid condition. Onions must be small, not a large growing vegetable, 56 pound boxes preferred for both onions and potatoes, but 100 pound boxes would answer if properly bound at both ends and rope yarn tied round the middle of the case. If Canadian packers will send me *their lowest quotations* for any or all of the articles mentioned in round lots F. O. B., I will send the information to the right parties, when doubtless orders will follow worthy of their attention, but I must again emphasize that this is a very keen market and fancy prices, therefore, are unobtainable.

## AGRICULTURAL IMPLEMENTS.

The demand for some years, for agricultural implements will be considerable notwithstanding the enormous quantities of the cheaper grades already disposed of by American firms. I mailed to the department a few days ago a report together with cuts of all kinds of agricultural machinery required for Boer and refugee repatriation, very kindly furnished to me by the Imperial Commissioner of Land Repatriation at Pretoria. This officer is associated with one or two ex-Canadian officers now employed by the Imperial authorities, all of whom are ready to extend something more than cold justice to Canadian manufacturers. I shall be pleased to hear from some of them with all the information they choose to give me, when I will at once communicate (in their behalf) with the Imperial Repatriation Land Board at Pretoria, or they may address the commissioner direct just as it suits them. One the largest Canadian implement manufacturers have sent over a special representative to spy out the land, a gentleman of experience and ability. I have reason to know that his mission will be eminently successful. I hope soon to hear of others coming.

## WHEAT AND FLOUR.

Montreal Milling Companies are adding to their already established reputation by the superior article of flour they are sending to South Africa, especially to the Transvaal and Natal. Two of the big concerns whose headquarters are at the commercial capital have a couple of special representatives out here, who are traversing South Africa from Cape to the Zambesi almost, in the interests of their mills, and have booked large orders. The *Ontarian* has brought big consignments of flour, and the steamers to arrive in December and January are also to bring large shipments for these companies. Another firm, also hailing from Montreal, were good enough to send me a few circular letters, well gotten up soliciting orders for food stuffs. They give all particulars, prices, discounts, terms, &c., and these were at once mailed from this office to a number of leading importers in South Africa and business is likely to follow. I shall be glad to hear from other manufacturers sending a dozen or so of just such letters typed when they shall have the same attention.

## BOOTS AND SHOES, AND LEATHER

Over 90 per cent of boots and shoes and other leather goods are imported into South Africa. The Americans are slowly but surely taking the lead in some of the expensive men's wear, but for all other kinds Leicester and Northampton are holding their own.

Three or four English factories have retail stores of their own in all the important centres throughout South Africa. For instance there are perhaps sixty retail boot and shoe stores in the various towns doing business as the "Commonwealth" shoe stores. These are owned by manufacturers near Northampton, England. They have a wholesale depot at both Cape Town and Johannesburg, and supply their retail establishments from them. "Cuthbert's Limited" have another set of stores throughout South Africa conducted and supplied in the same manner, and have their factory also in England. Both these concerns have had an established foothold for several years and American salesmen have not been able to make very serious inroads thus far into their sales. If, however, a Canadian Boot and Shoe Association including a number of manufacturers making different lines had courage enough to open up a Central Wholesale Depot in South Africa and establish retail branches in several of the growing cities and towns with a few up-to-date Canadian shoe salesmen looking after them it would only be a very short time before Canadian styles and methods would 'take on'. The retail prices are enormous as compared with those obtained in Canada. The men's and women's fine, medium quality of boots out here are never less, but sometimes more than, double the figures asked for the same qualities by retail shoe dealers with you. It must not, however, be forgotten that rents and salaries are somewhat higher here than in Canada.

## TIMBER AND WOODENWARE.

The demand for all sorts of timber in the Transvaal for building and mining purposes is extraordinary. Millions of feet lie at the Coast ports and in time will find its way to Johannesburg, meanwhile the scarcity of this article and all descriptions of woodenware, such as doors and sashes, &c., &c., retard business to a serious extent.

Canadian timber dealers appear to have enough to do at home, without exploiting this market. The United States and Norway are supplying South Africa to a considerable extent with lumber of various kinds. In doors, sashes and furniture of all sorts several of the Canadian manufacturers, including the Canadian Furniture Association, are turning their attention to the wonderful possibilities for their industries all over South Africa. The two Canadian Commission Firms in Cape Town and Johannesburg deserve every credit for the way they have kept Canada to the front in pushing these articles and often under great difficulties.

## PAPER, PAPER-BAGS AND LYNOTYPE MACHINES.

A newspaper syndicate controlling the leading newspapers in Cape Town, Bloemfontein, Johannesburg, Kimberley, Port Elizabeth, &c., is inquiring about Canadian paper industries, and their ability to supply paper in large quantities for press purposes.

Manufacturers of paper-bags should also turn their attention to the growing demand for bags of all sizes and weights, containing the printed names and addresses, &c., of the business men.

Linotypes of Canadian manufacture are being used in several printing offices and appear to give excellent satisfaction. The newspapers in South Africa are increasing in numbers and influence, and the demand for all these articles must necessarily increase. A large explosive company with ramifications all over the continent are inquiring for cartridge paper and shooks made in Canada. They purchase many hundreds of tons annually. Will Canadian manufacturers who are prepared to do business in the above lines send prices current and, if possible, samples, and I will at once place them in communication with inquirers ready to do business at right prices.

## CARRIAGES.

A Johannesburg firm of excellent standing wants an agency for Canadian carriages for the Transvaal, Natal and the Orange River Colony. They are in a position to do considerable business for a firm making the lighter grades in various styles and at reasonable prices. Several Canadian carriage manufacturers are now doing business in South Africa. By studying carefully the mode of packing and economizing space for shipping purposes a very much larger business in carriages and carriage supplies could be done.

## MUSICAL INSTRUMENTS.

Some of our cabinet organ and piano companies have been (from time to time) sending cabinet organs and pianos to South Africa. Musical instrument dealers in Johannesburg, Pretoria, Durban and Cape Town are handling Canadian instruments. It was a pleasure for me to hear from the buyers, of their excellent quality in tone and finish. They predict a very largely increased trade in the near future.

## CAPE COLONY EXPORTS FOR 1901 OF INTEREST TO CANADA.

|                              | Quantity.         | Value.    |
|------------------------------|-------------------|-----------|
| Ox and cow hides . . . . .   | 2,390,894 lbs.    | £ 58,566  |
| Goat skins . . . . .         | 3,752,060 lbs.    | 103,002   |
| Sheep skins . . . . .        | 15,107,511 lbs.   | 286,216   |
| Fleece washed wool . . . . . | 1,368,739 lbs.    | 42,657    |
| Scoured wool . . . . .       | 6,212,019 lbs.    | 302,774   |
| Grease wool . . . . .        | 57,628,941 lbs.   | 1,143,815 |
| Ostrich feathers . . . . .   | 412,337 lbs.      | 839,049   |
| Diamonds . . . . .           | 2,539,059 carats. | 4,930,104 |

## TANNERS AND WOOLLEN GOODS.

I would like to call the attention of Canadian tanners, woollen manufacturers and jobbers in wool to the exports by Cape Colony of hides, skins, and dressed and undressed wools as shown in the tabulated statement above. They find a market principally in England, the United States and Germany, and materially assist in supplying their cargo vessels with return freights. Cape wools largely find their way to Canada via England. Cape goat and sheep skins likewise, and when manufactured into dongola, bengola, Indian and imperial kids, are extensively used by Canadian and American shoe manufacturers. Now that a direct line of steamers leaves Canada monthly for South African Ports what is to hinder the Canadian tanners and woollen industries from getting their raw material direct? and thus effect a saving in freights and broker's commissions, and at the same time give Canadian ships a return cargo? I shall be glad to hear from any Canadian industries interested, with inquiries or suggestions along these lines, and if desired place them in communication with the leading exporters of these products at the Cape.

## CAPE TOWN EXHIBITION OF 1903.

Mr. A. P. Baker, of London, England, is the manager of the proposed exhibition. He arrived here from England this week.

This gentleman informed me that it is to be a purely British exhibition with ample space reserved for Canada and the other colonies. A very large number of prominent British manufacturers in agricultural implements, mining machinery, food products, textiles, &c., have applied for space and proposed to send carefully prepared exhibits. He expects Canada, Australia and Ceylon to make a specially good display. Mr. Baker has unbounded faith in its ultimate success, and many of the prominent people of Cape Town, I understand, are assisting him. After an interview next week with Sir Gordon Sprigg, the Prime Minister, to invite his co-operation, the managing director of the proposed South Africa British and Colonial Industrial Exhibition goes North to Johannesburg and other points, and hopes to enlist the sympathies and support of their prominent people and afterwards he returns to England, in January, when he expects to hear through the High Commissioner what Canada proposes to do about the exhibition.

I have the honour, to be, sir,

Your obedient servant,

J. G. JARDINE.

## (C.)—TRINIDAD AND TOBAGO.

## REPORT OF COMMERCIAL AGENT.

(Mr. Edgar Tripp.)

PORT-OF-SPAIN, TRINIDAD, December 2, 1902.

The Honourable  
The Minister of Trade and Commerce,  
Ottawa.

## SUGAR ESTATES.

SIR,—It is gratifying to report that notwithstanding previous losses, the proprietors of sugar estates who had been able to carry on until the end of last crop, have with hardly an exception, managed to maintain cultivation since. This would probably have been impossible but for the reviving confidence in the industry resulting from the Brussels conference whose finding has now been so happily ratified in the British Parliament. The enormous quantities of bounty fed beet which will be thrown on the English market before the curtain rings down on bounties in September next, will probably defer the good time, for which the planter has so long been vainly hoping for, and the year, but that time is now in sight, and it is no longer hoping against hope.

West Indians have never asked for more than the opportunity to compete openly in a fair field without favour to the foreigner. They are contented to stand or fall if their main product cannot hold its own upon its merits. For the first time within fifty years the chance will now offer. The unfair competition alike of slave grown and bounty fed sugar will have disappeared; and unless those who best know the capacity of the soil of these colonies are strangely mistaken, there is an era of prosperity before them equal if not more abundant than that of the days of long ago, when the name West Indies was synonymous with wealth.

## CANE FARMING SYSTEM.

A very interesting and encouraging feature in connection with the sugar industry of late years, has been the extension of the cane farming system. In former times no canes other than those grown by the proprietor were ground at his mill, but gradually it became the custom, thanks to the initiative, 25 years ago, of Sir Nevile Lubbock, chairman of the New Colonial Company, Limited, London, owners of large estates here, to let out small plots of their land to the peasantry and to purchase the canes grown thereon at so much per ton delivered at factory or in field. This division of the agricultural farm, the manufacturing part of the business, has proved successful. There are now ten thousand small farmers, 5,000 West Indian and 5,000 East Indian, who sold between them to the factories last crop 185,000 tons of cane, being half as much as produced on the estates themselves, and received, even in these days of low value, the sum of \$327,183. An indirect benefit of the system is the encouragement of a resident peasantry with a stake, however small, in the colony. It is urged by some that if cane farming proceeds too rapidly, the regular estates will be still further deprived of the labour, the want of which is already severely felt. It may, however, be expected that with the more assured future of the cane industry now obtaining, the recent restrictions deemed prudent with regard to East Indian immigration under state control will disappear. The wise introduction of Indian labour saved the colony at a former very critical stage, and upon its uninterrupted current very much in the future will depend.

## COAL DEPOSITS.

The prospecting for coal in the center of the Island undertaken by the government on a somewhat large scale, has not, I am sorry to say so far resulted in anything beyond the discovery of a fairly large quantity more or less near the surface. The boring operations continue, but no defined seam has yet been struck.

## ELECTRIC TRAM LINE.

The telegraph will have told you of the very successful opening of the first section of the electric tram line by the Trinidad Electric Company which is principally owned in Canada. The excellence of the work which has been done by this company under the able supervision of their representative, Mr. Teele, is universally admitted and instils confidence that the extensive and valuable public concession they have acquired is in good hands.

## UNION BANK OF HALIFAX.

The Union bank of Halifax appears already to be obtaining a good share of the business of the place. In the capable charge of Mr. McRae, there is little doubt that the establishment of this branch will bear favourable fruit to the colony and to the bank itself.

## POST OFFICE ORDER SERVICE WITH CANADA.

The announcement that a direct post office order service has been established with Canada is welcome, as the previous delay in sending via England caused some inconvenience. It is hoped that this improvement will be shortly followed by another which is equally required, viz. :—the parcel post. It is difficult to overestimate the boon which this has proved with Europe, and, more recently, with the United States, and I trust it will soon be introduced between Canada and Trinidad.

## POPULATION.

The population of the colony keeps pace with its commercial progress having increased from 205,000 in 1891, to about 282,000 in 1901. The death rate last year was 24·9, much higher than it would or should be but for the excessive infant mortality which unfortunately prevails amongst the lower classes. Thirty-seven persons died at 95 years old, and 15 were over 100, so that local conditions would appear to compensate in age for the youth which suffers.

## PICKFORD AND BLACK STEAMSHIP SERVICE.

Messrs. Pickford and Black have issued a little pamphlet entitled 'A hundred golden Opinions', being testimonials freely accorded by passengers regarding the excellent accommodation and courteous treatment received on their steamers. This merely confirms what I have always heard regarding the Line from residents here who have travelled by it, and it affords me pleasure to place this additional testimony on record.

## CANADIAN FOODSTUFFS—FLOUR.

Canadian foodstuffs are looking up, or perhaps I should say, by getting better known are better appreciated in our market. One large importer states that the order sent for a certain brand of flour could not be executed, the demand being greater than the supply at the time. I learn too that there is frequently a delay of from five to six weeks in executing orders for flour. It must always be remembered that these delays do not occur in New York, and comparisons will be made. In the United States stocks are kept on the

seaboard ready for immediate shipment, and with a market which varies so often time is of course of much object.

## BUTTER.

There has been a considerable set back in the butter trade owing to irregularity of quality. Some recently received has been quite unfit for tropical shipment. It may safely be said that the butter business of this colony ought to be in the hands of Canada, and would be if the same attention to detail and standard displayed elsewhere were attended to.

## CHEESE.

This is more than holding its own. But a short time ago Canadian cheese was always quoted from 2 to 3c. below American. It has now the same value on the market, and of the two is preferred as indeed it ought to be.

## MACHINERY.

The importation lately of £1,000 worth of Canadian machinery formed an unusual item, which it is to be hoped will not be so in the future. The importers were the Trinidad Electric Company. It seems a pity with such large Canadian interests that they had to go to the United States for all else they required. What are your electrical manufactures doing that they let their own people find it advantageous to go elsewhere?

## CORDAGE AND TWINE.

Quantities of cordage and twine are now coming from Canada, but I learn in connection with this trade that one of our largest importers has nearly withdrawn his custom from a leading house on your side owing to being expected to make payment by draft on Canada instead of as usual on London.

## EXCHANGE.

The course of exchange so largely favours the remittance from here of paper payable in London in settlement of American and Canadian accounts, that it is generally adopted, as a matter of course, with the United States. So long as the bills are good negotiable documents, it would appear bad policy to hinder a growing trade with an obstacle never presented by an older and still formidable competitor.

The whole question of credit, drafts against documents, and mode of remittance seems in an uncertain stage, but this will probably right itself as the parties get to know each others requirements and customs better. Meanwhile it causes some friction in the trade relations, and business is often diverted in consequence. So many merchants here have referred to this that I think it right to mention it. The usual terms and facilities offered to reputable houses by their suppliers in London or New York are well known, and might with advantage be recognized and adopted, if I may venture to say so, in Canada.

Another little complaint I should mention is, that a direct trade has in one prominent instance been discouraged by the discovery of the merchant here that New York Commission houses were getting a discount of 5 per cent more than allowed to himself on the same goods when sent to him without the intervention of the middle man.

## OATS.

Oats I am glad to find are coming more freely by the all Canadian route.

## HIDES.

A good trade is springing up in hides, wet and dry salted, which are being principally purchased by the representatives here of the St. John Hide Company, and I am glad to note that this company not only buys the raw material from us but sends back the manufactured article for our use again in the shape of leather.

## TRINIDAD SUGAR.

Customs Returns do not tell correctly the extent of our exports to you. A large quantity of trinidad sugar was sold through New York lately to Montreal refiners. It went up on New York steamer, with optional bill of lading, New York or Canada, and I hear also of large lots of Demerara sugar going direct to your refiners, which would be larger still but for the difficulty of the steamers getting over the bar off the Georgetown River. Still there is some lament at the quantity of beet sugar which notwithstanding the tariff preference to cane from the British West Indies, still finds its way amongst your consumers.

## BOOTS AND SHOES.

Of Canadian boots and shoes I hear nothing but what is good. Price, quality and appearance are all in their favour, and the demand is steadily increasing. The total imports of boots and shoes for year ending March 31 last, were £42,963, so that it is a business worth cultivating. Canada's share was only £132, but the current year's figures will tell you a different tale, and if the goods continue up to the present standard, and are kept before our buyers, they should show up well in our future returns.

## LEATHER GOODS.

Manufactured leather suggests saddlery, of which we have received next to nothing from Canada hitherto. There is an opening there.

## GENERAL.

Perhaps the most satisfactory matter to refer to is the fact that the steamers of Pickford & Black nearly always take up full cargoes. This is indeed a healthy sign. Where our produce goes to sooner or later there will come from the varied supplies we require.

I have the honour to be sir,

Your obedient servant,

EDGAR TRIPP.

## (D.)—JAMAICA.

## REPORT OF COMMERCIAL AGENT.

*(Mr. G. Eustace Burke.)*

KINGSTON, JAMAICA, December 22, 1902.

The Honourable

The Minister of Trade and Commerce.  
Ottawa.

SIR,—I have the honor to submit for your information the following :—

## TRADE EXCHANGE.

It is gratifying for me to be able to report that while statistics are not available to demonstrate the averment, I am satisfied that though slow, yet recently some improvement has manifested itself in trade relations, and a mutual exchange of commercial commodities, between this colony and the Dominion.

## FLOUR.

The Canadian Ontario Brands 'Royal' and 'Dainty' are being very successfully handled by one of our local commissions agents, and other milling concerns of the Dominion would also ere this have been sharing an appreciable portion of the Island's custom if they were content to ship on consignment as in the case of the miller of the brands alluded to. One cannot help but thinking it unreasonable of manufacturers in any line of goods desirous of introducing their wares and merchandise in a new market with the intention of capturing a fair share from the already well established brands, and manufacturers who expect that the local merchant already satisfied with their present operations and conditions of their correspondents, must take all the risk of direct importations of the new innovators. I repeat, it is unreasonable commercially, and as other manufacturers of almost all line of goods, both in Europe and the United States, appear by their methods and facilities offered, to fully realize this, so long therefore as Canadian producers and manufacturers expect the impossible, so long will their more enlightened rivals shut them out from having their fair share of this market with its £1,699,525 imports as in the case of the financial year to March 31, 1902, as disclosed in the Collector General's report just issued and which I will refer to later on.

## PACKING REQUIREMENTS.

I have so often, (and have as often noticed similar strictures on the point from other commercial representatives of the Dominion) referred to the callousness and unaccountable indifference of the Canadian manufacturers and producers to the demands of the trade regarding packing size of package, prompt attention to orders and special directions, and replying to correspondence of inquiries, &c., also giving quotations F.O.B., and when possible C.I.F., that like others placed in my position I feel almost despaired on the subject.

I will however quote from a report I recently came across from the German Consul General in one of our colonies to his government. The consul commenting on the development of American trade was forced to write thus : 'In seeking for the reason why the imports of United States goods have increased so rapidly, it is not merely the capabilities of the United States factories and the quality of their manufactures that

explain the phenomenon. The United States manufacturers and merchants have pushed their trade with praiseworthy energy and persistence, and this, together with their willingness to meet the wishes of buyers, has led to the great increase of American trade here'.

It is pleasing, however, to be able to state that in one or two instances, especially in the case of butter and cheese and boots and shoes, some attention has been paid to my oft repeated advice, with the only possible result that those few who have been wise enough to realize that it would pay to depart from old-fangled lines and methods, have been, and are still very amply rewarded, and with every encouragement of future expansion.

#### IMPORTS—FLOUR.

For the financial year referred to above, the colony imported 157,921 brls. of flour valued £142,129 as against 148,818 brls. valued £133,937 for the previous year, thus showing a very appreciable increase in the consumption of the commodity.

#### BUTTER AND CHEESE.

As previously mentioned, one Halifax firm, has complied with the requirement of the trade, viz: putting up choice creamery in  $\frac{1}{2}$ , 1 and 5 lbs. tins, also in kegs of 34 lbs., and dairy in 25 lb. tins and kegs; and cheese in strong single boxes of about 25 lbs. each, are doing a very lively increasing business.

For year ending 31st March, 1902, 749,187 lbs. butter valued £20,957 was imported, and of cheese 174,006 lbs. valued £4,350. These figures disclose a falling off in the importation of cheese as compared with the previous year of 13,631 lbs., valued at £340, while butter shows a considerable increase both in quantity and value.

#### BEEF WET SALTED.

Of the above, 6,540 barrels, valued £17,986 were imported which is a decrease on the previous year by 384 brls., valued at £1,057.

I desire to bring particularly to notice that the cause of this noticeable decrease is to be attributed to the operation of the trusts in the United States, which sent up to importers here of the best brands, family quality, from \$7.25 per half barrel to \$9.25. To-day it is \$9.50 as per cabled market report.

#### PORK.

So also in the case of pork. While for the similar period 9,460 barrels were imported at a cost of £29,326 for the year under review, but 6,500 barrels were imported, valued at £19,500 thus showing a decrease in importations of 2,960 barrels valued at £9,327 also attributed to the operations of trusts and 'corners' in the United States, which in turn sent up local retail prices to such a pitch that it naturally had the effect of curtailing the usual consumption.

This is therefor an opportune time for Canadian packers to seize the opportunity and introduce their goods in this market. With the best brands of family beef as imported in this island at \$9.50 the half barrel in the United States, and pork from \$18.25 to \$22 per barrel, and hams and bacons at 14 to 16c. per lb., surely Canadian packers ought to be able to successfully compete and capture an appreciable share of the respective imports.

#### HAMS.

For the year 1902, imports were 152,949 lbs., valued at £5,686; 1901, 161,791 lbs., valued £6,067.

## BACON.

|           |                               |
|-----------|-------------------------------|
| 1902..... | 33,965 lbs., valued at £1,132 |
| 1901..... | 33,059 lbs., valued at £1,202 |

## JAMAICAN IMPORTS.

The total volume of imports amounting to £1,699,525 was £47,598 in excess of the previous year. Of this amount the island's custom was distributed in the following proportion.

|                      |      |
|----------------------|------|
| United Kingdom.....  | 46·8 |
| United States.....   | 43·3 |
| Canada.....          | 7·0  |
| Other countries..... | 2·9  |

## MANUFACTURED IMPORTS.

I deem it expedient to afford the manufacturers of the Dominion some idea of the class of goods usually imported and the respective annual value of such imports. It will be observed that there has been a general increase in the consumption of all articles under this head, which I venture to think should be encouraging and prove interesting.

## LUMBER—WHITE AND PITCH PINE.

It may be interesting to Canadian lumbermen to note that while there has been an appreciable increase in the importation of white pine lumber, there has been a marked decrease in the consumption of pitch pine, as the following figures will show.

White Pine—2,282,073 feet, valued £9,385—represent importations for 1901-02 ; while for 1900-01 the figures stood 1,901,756 feet, valued £7,987.

Pitch pine—1901-02—3,913,299 feet, valued £14,818; 1900-01—4,566,774 feet, valued £17,315.

It is however, curious that not a single cargo of white pine (a product of Canada) arrived from a Canadian port; all imports coming via New York and other United States ports. I am satisfied that if they care to grapple with the situation and approach such lumber firms as Messrs. Eml. Lyons & Son, D. Henderson & Co., and A. L. Malabre & Co., doing business in this city, they would have no cause to regret their efforts for direct trading.

## EXPORTS.

The total exports for 1901-02 are valued at £1,939,142. For 1900-01, £1,563,363 showing a net increase of £142,066.

The principal items exported were:—

|                     |            |           |          |         |
|---------------------|------------|-----------|----------|---------|
| Annatto.....        | 394,424    | lbs.      | valued £ | 1,643   |
| Bees-wax.....       | 992        | cwt.      | "        | 6,020   |
| Honey.....          | 16,804     | "         | "        | 9,241   |
| Divi-Divi.....      | 1,748      | "         | "        | 985     |

| Sheep wool.....     | 31,459     | "         | "        | 393     |
| Lime Juice.....     | 188,947    | galls.    | "        | 7,872   |
| Lancewood spars.... | 17,431     | number.   | "        | 3,286   |
| Walking sticks....  | 2,136      | bundles.  | "        | 677     |
| Wood—Bitter.....    | 1,106      | tons.     | "        | 1,659   |
| " Ebony.....        | 163        | "         | "        | 424     |
| " Fustic.....       | 6,833      | "         | "        | 17,084  |
| " Lignumvitae.....  | 556        | "         | "        | 1,612   |
| " Logwood..         | 41,107     | "         | "        | 103,795 |
| Logwood extract...  | 5,149      | packages. | "        | 26,144  |
| Tobacco.—           |            |           |          |         |
| Leaf.....           | 47,889     | lbs.      | "        | 2,394   |
| Cigarettes.....     | 13,759     | "         | "        | 1,547   |
| Cigars.....         | 39,122     | "         | "        | 11,904  |
| Turtle.....         | 2,386      | number.   | "        | 4,772   |
| " prep. & dried.    | 14,658     | lbs.      | "        | 1,465   |
| Tortoise shell..... | 3 027      | "         | "        | 757     |

The island exports were distributed as follows :—

|                      |      |
|----------------------|------|
| United Kingdom.....  | 21·1 |
| United States.....   | 65·6 |
| Canada.....          | 1·6  |
| Other countries..... | 11·7 |

I should here note that the take of the United Kingdom is an increase on the two previous years, in 1899-1900, her take being 19·2 and 1900-01 being 18·8.

The above noted improvement may be accounted for by the inauguration of the direct line (Elder Dempster & Co.) at the beginning of 1901, which took, in addition to large cargoes of fruit, considerable portions of other valuable products of the island.

SHIPPING.

The shipping returns of the year under review shows that there has been an increase of 172 steamers with a tonnage of 136,337 tons which came to the Island, as compared with the previous year.

During the year 105 steamers arrived from the United Kingdom, being an increase of 24 on the previous year, whilst 89 cleared as against 61 for last year.

634 steamers arrived from United States Ports, being an increase by 166 on the preceding year, whilst 611 cleared, as against 488 of last year, showing an increase of 123.

The above very marked satisfactory increase is unquestionably due to the steady uninterrupted development of the fruit trade with the Mother Country and the United States.

While there are no available authorized published statistics which give the arrivals and departures from and to Canadian Ports, it can be stated with some amount of accuracy that the total certainly does not exceed 20 either way.

THE SUGAR INDUSTRY.

The sugar industry shows encouraging signs of improvement; for although the exports of sugar itself has not increased very much during the six months under consideration, yet the export of rum, which is associated with the industry, increased by over 17 per cent; and the excise duty on rum also shows an increase of £10,000 over a similar period in the previous year, which is an unmistakable sign of an increased circulation of money among the peasantry and labouring classes.

OTHER PRODUCTS.

The figures also demonstrate that the export of pimento has increased over 38 per cent, and coffee which is classed as a staple product by nearly 89 per cent.

FRUIT.

11,000,000 bunches of bananas have been exported as against 8,000,000; and 27,000,000 oranges as against 17,450,000. Cocoanuts also show an improvement from 11 millions to 16½ millions.

DYEWOODS.

Logwood and fustic show an export development of 19 per cent.

TRANSPORTATION.

A monthly Journal published in London and devoted to the development of trade between Great Britain, Canada and the West Indies, in the course of an editorial note

in one of its recent issues remarks that 'the best way of creating a demand for Canadian goods (in the Islands) would be for the Canadians to make extensive purchases of West Indian Products'.

It is only fair, however, to say that whatever may be the desire of Canadian importers and distributors to deal direct with this island, they are certainly debarred as a result of the lack of frequent and 'up-to-date' steamship transportation. To substantiate this, I do not think I can do better than quote from a letter shown me, and which was received from Canada by a house in this city, in reply to an inquiry to supply fruit during the season.

The Canadian firm wrote thus :—

'*Re Oranges and bananas* :—I am the largest dealer in these lines in                      and could handle about 200 or 300 boxes Jamaica oranges a week, according to price.....

'*Re Bananas* :—I handle from 1,000 to 1,500 bunches a week during the season.. ....., but I do not see that I can do any business by this line (*viz.*: Canada-Jamaica), as I understand they will not give a rate on fruit from Jamaica to St. John.'

Now, no one can blame the owners of the line in question. They see a safe business with ample remuneration, and they naturally, as business men, load the steamers on owners' account, refusing to take outside freight. So remunerative has the venture proved, that I understand that in the spring of the coming year two additional vessels will be added. But it may be regarded as a certainty that the same conditions will prevail.

#### ORANGES AND BANANAS.

The above conditions being inconvenient and unsatisfactory, and therefore undesirable, little advantage is taken of it. Jamaica oranges therefore which are transported to Canadian centres pass through 'middle men' in New York and other United States centres, which naturally result in greatly enhancing the cost, therefore hampering its popularity and consumption, with the inevitable consequence of restricting trade exchange between the colonies.

Referring to bananas, the situation is even more desperate; for in compliance with an agreement of the Hamburg-American Co., with the shippers of Port Limon Fruit, the former is debarred in taking bananas from this island. And as all other banana steamers trading here with the various United States Ports, are exclusively loaded for owners or charterers account, it is clearly obvious that under present conditions the development of the fruit trade with Canada which would so incalculably bring about a mutual exchange of commodities is simply impossible.

Rapid steam communication, with its counterpart, economic transportation, bringing the fruit within the reach of the masses, have educated the citizens of the United States, in all stations in life, to regard the banana as fruit and food, while the orange is looked upon almost as a necessary of life. A similar process is now being proceeded with in the United Kingdom with more than a satisfactory outlook. Already it has been found necessary to duplicate the service, by the despatch of weekly cargoes. Similiar methods would within a very short time develop Canada's trade fourfold of its present consumption.

The United States government grants an American Steamship Company a subsidy of \$50,000 for a weekly service between this and Boston for ten years. But which as a fact has now merged itself into almost a daily service, as a result of the phenomenal development of the trade which the shipping statistics of the island I have already drawn attention to conclusively demonstrate.

#### CANADIAN PACIFIC ENTERPRISE.

From a letter from a responsible source in Canada, which I have been afforded the opportunity of perusing, I believe that the superintendent of the Atlantic division, and the executive of the Canadian Pacific Railway have under their consideration the possibilities of promoting exports of Canadian products by their steamers to this island, returning with fruit and general cargoes.

I shall be only too glad to furnish the company with the most detailed particulars they may require, and can even at this moment give every assurance of ample dock facilities, and little fear of not obtaining return cargoes, providing in this latter the boats and conditions will fill requirements.

It is certainly encouraging to find that so great and powerful an organization as the Canadian Pacific Railway directing their attentions to Jamaica.

#### FRUIT TRADE LAW.

I am pleased to be able to report that a bill has been drafted on similar lines as the Canadian Fruit Trade Law, and which will possibly be put through the necessary stages at the regular annual meeting of the Legislative Council, which takes place in the early part of the coming year.

#### THAT RECIPROCITY CONVENTION.

As no doubt already learnt, on December 4, the President of the United States remitted to the Senate, among others, the Jamaica Treaty (drawn up some time ago) for extension of time limit.

On its being learnt that the treaties of Barbadoes, Trinidad, and British Guiana had been favourably reported on, on a 20 per cent reciprocity basis, it became evident that some clause in the Jamaica Convention must have been objectionable, and it certainly is not difficult to be assured it must have been that dealing with the entry of fruit.

The sugar planters, as it may well be understood, are urging the government to exercise some activity in the matter, and if necessary dilate the objectionable fruit clause, claiming that a 20 per cent off the duty on sugar in the States would mean to them twenty seven shillings a ton; and justify their suggestion by the statement that fruit already enjoys an annual subsidy of £20,000 per annum from general revenue.

In the course of a reply, however, to inquiries made of His Excellency the Acting Governor, as to the position the government will likely take to secure the ratification of the convention, the Acting Colonial Secretary stated—and it must be admitted with some truth—that ‘there is some divergence of opinion as to the advisability of endeavouring to make such a treaty’, but ‘that all will be done that is practicable to safeguard the interests of the colony’.

#### CENTRAL FACTORIES.

The Central Factories Law, passed last session, which provided for the government's guarantee of capital as well as interest, in deference to Mr. Chamberlain's instructions will be amended at the next session of the council providing for the government guarantee of interest only, at 5 per cent. There has been already four applications sent in to the government, but only one will receive consideration, same being in compliance with Mr. Chamberlain's views.

#### CONFIDENCE IN THE FUTURE.

Apart from central factories, it is gratifying to note the confidence of independent proprietors in the future of the sugar industry by the steady stream of improved and expensive machinery arriving by the direct line and other steamers from abroad.

#### CONFEDERATION OR CLOSER COMMERCIAL UNION.

Within the last two or three months the above subject has fairly occupied the attention of thinkers, both in Canada and this island. The press of both colonies have taken up the subject warmly. The Westmoreland Sugar Planters' Association have also passed a resolution favourable to the idea.

Mr. W. Simpson McCormack, of this city, contributed several letters to the *Daily Telegraph* strongly advocating political confederation, failing which, Commercial Union.

In the course of Mr. McCormack's communication, he called attention to a fact which I consider in the interests of Canadian manufacturers and producers is worth reproducing, the moral of which cannot be but clearly obvious.

The correspondent correctly says : 'it is no secret to the commercial community to be told, for it is proverbial, that a considerable quantity of our import and export trade credited to the United States, in the one case, owes its origin to Canadian and other foreign manufactures, and in the case of export, they simply go via American ports as a matter of convenience of transportation facilities. Is it not known that 9-10th of the oats imported here is of the industry of the Canadian farmer ; and what of split peas, soda and fancy biscuits, tallow, tin and enamelled ware, boots and shoes, organs, aluminum goods, knock down furniture, agricultural implements, rope and cordage, paints, lumber and other building materials, metallic roofing, canned goods, butter, cheese, bacon, hams, cereals, and flour also, and other food stuffs and manufactures.'

'But more, I have detected goods imported here from the English market, unquestionably to be of Canadian origin. And to verify this, one only has to look on the published manifest of the foreign shipping journals and note the manifold quantities of the articles shipped from Canada and consigned to well known manufacturers 'putters up' and shippers to these colonies, to be satisfied of the correctness of my statement.'

#### COTTON GROWING.

The practicability of remunerative cotton growing in the island is at present occupying considerable attention, and through the instrumentality of Sir Alfred Jones, the Cotton Growers' Association of Liverpool have granted £100, to assist in the experiment. The amount will no doubt be placed at the disposal of the Agricultural Society, and will probably be augmented by the funds at the disposal of the society, or a special grant from general revenue.

#### THE TOBACCO INDUSTRY.

A lively 'spurt' has recently taken place in the export trade of Jamaica cigars to the English Market. The Montpelier Factory and that of B. & J. B. Machado, and the 'La Paloma' manufacturers, as also other concerns receiving increased orders.

#### HONEY AND FRUIT PRESERVING FACTORY.

A company is being formed as above, with head quarters in Kingston. Shares have been freely taken both here and in the Mother Country. Sir Alfred Jones investing £1,000 in the concern.

#### THE TOURIST SEASON.

The tourist season may be said to be now on, and will unmistakably be a record one. I do hope many Canadians will be numbered among the numerous visitors.

As it is evident, from comments and the criticism of a section of both American and European press, that a misconception exists abroad, to some extent, as to the Geography of these islands, and therefore the effects of the St. Vincent and Martinique volcanic eruptions on the West Indies generally, it may serve a very useful purpose to reproduce the following extract from the opening address of His Excellency the Acting Governor, Mr. Sydney Olivier, to the Legislative Council on November 4, last.

Referring to the tourist traffic and the efforts of Sir Alfred Jones to popularise the Island as a permanent recognised tourist resort, Mr. Oliver pertinently remarked :— 'Jamaica has no volcanoes, actual or extinct, and it has not been disturbed by a serious earthquake for more than 300 years. There are volcanoes near Naples and in Sicily. Both are less than half the distance from the Riviera than Jamaica is from Martinique

and St. Vincent, whose volcanoes have lately caused such awful, albeit purely local, devastation. Yet we are not aware that any winter tourist has ever hesitated to go to the Riviera because Vesuvius once destroyed Pompeii and the eruptions of Etna have often devastated the adjacent regions of Sicily.'

The health of the Island continues excellent. It is also gratifying to note that as a result of improved methods of sanitation there is a marked decrease in the average death rate of the Island as compared with previous years.

#### TRADE AND COMMERCE.

As a consequence of the increased exports, which is evident in almost every line of the products of the Island, increasing the circulation of money, and therefore the purchasing power of the people, there is a general revival of trade all round.

Canadian producers and manufacturers to make a vigorous and determined effort with all the business energy at their command, for what should be their proper share of the trade of this Colony.

Such a desirable consummation will unquestionably be an important contribution in fanning the embers of British unity, which unmistakably must one day burst forth in that comprehensive flame which is now stirring every British heart, namely, Imperialism.

I have the honour to be, sir,

Your obedient servant,

G. EUSTACE BURKE.

### III.—GENERAL COMMERCIAL INFORMATION.

#### (A.)—IMPORTS OF PRINCIPAL FOODSTUFFS INTO GREAT BRITAIN.

QUANTITIES of Butter, Cheese, Bacon, Hams, Fish, and Eggs, Imported into Great Britain during the *months* of November and the *eleven months* ended November 30, 1900, 1901 and 1902. (*From British Returns.*)

## II. TARIFF CHANGES.

---

### (A.)—UNITED KINGDOM.

---

#### I.—IMPORT DUTY RATE ON DEXTRINE.

*(General Customs Order No. 79 of October 30, 1902.)*

On and after 3rd proximo, imported Dextrine shall be charged with duty at the rate of 6½d. the cwt. on the net weight of the article.

#### II.—BONDING OF CERTAIN ARTICLES LIABLE TO DUTY UNDER THE FINANCE ACT, 1902.

*(General Customs Order No. 82, of November 13, 1902.)*

According to a decision of the Board of Customs the following articles may be warehoused in bond :—Rice, arrowroot, cassava powder and tapioca, mandioca or tapioca flour, sago, sago flour, quaker oats, rolled oats and articles of a like character; and macaroni, vermicelli and similar preparations of dutiable cereals.

The Board's directions are to be sought before goods claimed as falling within the category of 'articles of a like character' and 'similar preparations of dutiable cereals,' as indicated in the list, are admitted to the privileges of bonding.

#### III.—ORDER OF THE BOARD OF AGRICULTURE DATED NOVEMBER 10, 1902, REVOKING VARIOUS ORDERS RELATING TO THE LANDING OF ANIMALS FROM THE CHANNEL ISLANDS.

This order revokes, as from November 17, 1902, the different orders referring to the prohibition of importation of animals from the Channel Islands.

### (B.)—BARBADOS.

---

#### I.—SURCHARGE OF 20 PER CENT ON IMPORT DUTIES.

*(Act No. 38 of October 21, 1902.)*

In addition to the customs duties levied under the Tariff Act, there shall be raised, levied and collected an additional duty of customs after the rate of twenty per centum on the amount of duty raised, levied, and collected under the provisions of the Tariff Act.

#### II.—DUTY-FREE ADMISSION OF CERTAIN MACHINERY AND APPARATUS.

*(Act No. 34 of 1902.)*

Machinery and apparatus imported for the purpose of manufacturing hard bread and crackers from imported flour are added to the list of goods exempted from duty on importation into this colony.

(C.)—BRITISH INDIA.

ALTERATION OF ADDITIONAL DUTIES ON BOUNTY-FED SUGAR, IMPORTED FROM FRANCE.

(Notification Finance and Commerce Department, No. 5502 S. R., dated October 16, 1902—Customs Circular No. XV. of 1902.)

In exercise of the power conferred by subsection (2) of section 8A of the Indian Tariff Act, 1894 (VIII. of 1894, as amended by Acts III. of 1896, XIV. of 1899 and VIII. of 1902), and in supersession of the rates of additional duty on the kinds of sugar mentioned against France in the notification in this department, No. 5242 S.R., dated October 16, 1901; the Governor General in Council is pleased to declare that the rates shall be revised as follows, with effect from September 1, 1902: Provided that the rates hereby superseded shall apply to any imported sugar for which the bill of lading was signed and given before September 1, 1902:

| Kinds of Sugar.   | Bounties Bestowed.  | Additional Duties to be Levied. |
|---|---|---------------------------------|
|   |   | Per Cwt.<br>Rs. a. p.           |
| Raw sugars from 65 to 98 per cent polarization for beet-root sugars, or 65 to 97 per cent for French colonial sugar ..... | 9·51 francs per 100 kilograms of refined sugar of 100 per cent of polarization* ..... | 2 13 11                         |
| Sugar candies .....   | 9·83 francs per 100 kilograms .....   | 2 15 6                          |
| Refined sugars in loaf or crushed, clear, hard and dry .....  | 9·83 " " .....  | 2 15 6                          |
| Raw and refined sugars in grains or crystals of a minimum standard of 98 per cent polarization .....                      | 9·67 " " .....  | 2 14 9                          |

\* The output of refined sugar from raw is computed by deducting from the polarization of the raw sugar twice the glucose, four times the ashes, and one and a half per cent for loss in refining.

### III.—COMMERCIAL AGENCIES.

The following Canadian Commercial Agents (whose addresses are given) will answer correspondence relative to commercial and trade matters, and give information to those interested as to local trade requirements in the districts they represent.

Such reports of general interest as have been received from them since the publication of the last monthly report of this department are appended.

J. S. Larke, Sydney, N.S.W., agent for Australasia.

James G. Jardine, Cape Town, South Africa, agent for South Africa.

G. Eustace Burke, Kingston, Jamaica, agent for Jamaica.

Robert Bryson, St. John, Antigua, agent for Antigua, Montserrat and Dominica.

S. L. Horsford, St. Kitts, agent for St. Kitts, Nevis and Virgin Islands.

Edgar Tripp, Port of Spain, Trinidad, agent for Trinidad and Tobago.

C. E. Sontum, Christiana, Norway, agent for Norway, Sweden and Denmark.

A. D. Campbell, Buenos Ayres, agent for Argentine Republic and Uruguay.

A. Poindron, 10 Rue de Rome, Paris, agent for France.

In addition to their other duties, the undermentioned Canadian agents will answer inquiries relative to trade matters, and their services are available in furthering the interests of Canadian traders :—

J. G. Colmer, 17 Victoria Street, London, S.W., England.

Harrison Watson, Curator for Canadian Section, Imperial Institute, London, England.

G. H. Mitchell, 15 Water Street, Liverpool, England.

H. M. Murray, 52 St. Enoch Square, Glasgow, Scotland.

W. L. Griffith, Western Mail Buildings, Cardiff, South Wales.

C. R. Devlin, 14 Westmoreland Street, Dublin, Ireland.

D. Treau De Cœli, 75 Marché St. Jacques, Antwerp, Belgium.

#### (A.)—AUSTRALASIA.

##### REPORT OF COMMERCIAL AGENT.

(*Mr. J. S. Larke.*)

SYDNEY, N.S.W., December 30, 1902.

The Right Honourable  
The Minister of Trade and Commerce,  
Ottawa.

SIR,—The first three weeks of this month were signalized by remarkable monsoonal rains throughout nearly all the inhabited portions of Australia. They were not only heavy in many districts, but were repeated so that in places more rain fell in these three weeks than in the three years previous. It can scarcely be said that the drought has broken up, time alone can determine that, but it has greatly improved the prospects for the future. It has averted a water famine that threatened many towns and villages as well as stations, and has started the grass well growing in a large section of the droughty area.

FLOUR.

The immediate effect has been to decrease the price of feed stuffs and increase the price of flour. The millers for the past twelve months have been making their profit out of the high price of their offal, but the decline in the price of the latter has created a necessity for increasing the price of flour, and the local is now almost equal to the price of Manitoba flour. The latter has practically not increased in price in months. Considerable stocks were in bakers' hands who resold it below the cost of importation. The low rates of freight still offered from New York has also kept the price of the Canadian article to its relatively low figure.

GRAIN FREIGHT RATES.

The remarkable difference between the shipping rate for grain from Winnipeg via New York and via Vancouver, favouring the former port, still continues so great that it is hopeless to expect the large trade from Vancouver that was looked for. Quotations from Vancouver have been steadily underbitten here. An attempt to fill a sailing vessel with a cargo of wheat in December was a failure, but it is hoped that she will be filled in January. The regular steamers have full cargo, and they are unable to take all offering by that line, but until the freight rates to Vancouver from interior points are lowered, little beyond the steamer's capacity is likely to come. This is to be regretted, as it is a fine opportunity for making Vancouver a port of export for grain lost. Just now the market is pretty fully stocked with both wheat and flour, and the cargoes contracted for will keep it so for nearly six months, but more must come. The Manitoba flour is getting into the markets of all the States, a quantity having been shipped to Perth, Western Australia. It could come much cheaper from the East than via Vancouver and transhipment at Sydney.

AUSTRALIAN WHEAT YIELDS.

The earlier estimates of the Australian wheat yields are not known to be greatly overdrawn. In November the statistician of the Government of New South Wales placed the area saved for grain at 476,190 acres, but he now returns it at only 388,376 acres, out of 1,561,704 acres sown. But even so, he estimates the average crop upon that less than one-fourth of the area sown at only 3·6 bushels to the acre, which is far below the previous worst on record. The year 1888 was the worst season of the previous thirty years, but then the yield was 4¾ bushels to the acre, and the crop larger than the estimate of the present one. The yield for three years is :—

|           | Acres<br>Sown. | Acres<br>Reaped. | Bushels<br>Threshed. | Bushels<br>per Acre |
|-----------|----------------|------------------|----------------------|---------------------|
| 1900..... | 1,862,752      | 1,530,609        | 16,173,771           | 10·6                |
| 1901..... | 1,704,612      | 1,392,070        | 14,808,705           | 10·6                |
| 1902..... | 1,561,704      | 388,376          | 1,411,219            | 3·6                 |

Instead of nearly three million bushels, as the sanguine estimated, New South Wales will require the equivalent of about nine million bushels in wheat and flour.

Victoria shows a better return. The acre sown was stated to be 2,068,400. Of these 1,439,275 failed or was fed to stock, and the remainder has yielded four and a half bushels per acre or about three million bushels. This state will require to import about three million bushels. South Australia can supply a surplus possibly equal to the requirements of Queensland and Western Australia.

NEW ZEALAND WHEAT RETURNS.

New Zealand so far makes a much better showing. The official returns of the acreage under crop show a net increase of 104,181 acres. The area under wheat for

threshing is 194,274 acres, an increase of 30,812 on last year. Oats: for threshing, 481,462 acres, an increase of 75,537; for chaffing, ensilage and feeding, 204,760 acres, an increase of 5,252. Barley, 2,187 acres; maize, 13,433 acres. As anticipated a considerable shrinkage of the quantity of grain on hand, the figures for wheat being 1,230,785 bushels, a decrease of 1,951,222; oats, 1,715,429 bushels, a decrease of 1,055,857 bushels. In view of the reduced stocks there will not be a large surplus of wheat to export, though she should spare a million and a half bushels of oats.

It would appear that three hundred thousand tons of wheat and flour will be needed in Australia, exclusive of other breadstuffs, and it is probable that about one-half of this amount has been contracted for. There is, therefore, a possibility for large shipments as yet from Vancouver if the freight facilities are improved. I am afraid it is too late to do much in oats, except some for milling purposes. Of course should the drought continue there will be a demand beyond even the capability of New Zealand to supply. A million bushels could have been sold for delivery, but the changing quotations sent here and the uncertainty of getting delivery lost the market. In April there may be a demand, and if so I will if necessary advise by cable.

#### FOODSTUFFS.

Other foodstuffs require but little notice. Potatoes have maintained a very high figure warranting large shipments from British Columbia, but as no space could be had on the steamers nothing could have been done. At one time a lot equal to those received here could have been sold at \$40 to \$50 per ton. Peas, beans and malting barley continue high. Efforts to get quotations and samples from Canada have been unsuccessful. In view of the high price of beans in Canada it is doubtful if any business can be done in them here.

#### APPLES

Some Canadian apples arrived here in October, and orders were given for two hundred cases. The shipment arrived by the last steamer, but were infinitely below the samples shown and were about half rotten. The consignee refused to take delivery, and the result must be a considerable loss. It is claimed that the fruit sent was not Canadian but United States apples reshipped at Vancouver. It is an unfortunate thing that such a shipment should have been made, as it is an injury to what should be an annual business.

#### FROZEN PIGS.

Some frozen pigs arrived in good condition, but, though shipped from Canada, were from the United States. It is claimed that succeeding steamers will bring Canadian. Offerings from Chicago keep the price down to about 13 cents C. I. F. & E. I believe the demand will continue throughout the next year. I notice that Canadian newspapers in quoting the Australian tariff place a duty of a penny per pound on frozen meat. There is this duty on meats preserved in any other way than by the cold process, but frozen is free.

#### MANITOBA FLOUR.

The sale of Manitoba flour is not only extending to all the states of the commonwealth and New Zealand, but I have hopes of getting it into the Pacific Islands. It is already known in Suva, but there are large sales of flour made here for New Caledonia, New Guinea and other islands. Much of the trade is for very low grade, commonly known as Sharps. Canada should be able to supply this as well as patent from No. 1 Hard Manitoba. The demand for general merchandise from these islands is yearly growing, and Canada should secure a share of this trade.

## TRADE IN THE PACIFIC ISLANDS.

The Commercial Agent of the Government of New South Wales who has visited Eastern Siberia has this paragraph in a recent report which may be of interest to Canadian manufacturers :—

‘In consequence of the United States having imposed a duty on Russian sugar, Russia has retaliated by imposing an extra 50 per cent duty on all goods from the United States, so that the extensive import of machinery of all kinds, which has obtained for some years past, is now practically stopped. The firms of Messrs. Clarkson & Co., and Tilhuan & Co., of Vladivostock, have been the principal importers in the past, and I would advise the engineers, foundries, boilermakers, &c., at your end to at once send their catalogues to these firms, who now look to import from England and Germany. A large trade in agricultural implements is done by American merchants with Eastern Siberia. If the makers in New South Wales can compete with the Americans, then they had better send their catalogues to the firms whose names I have given above, and to Messrs. Kunse & Albera, Vladivostock, and to Messrs. Emery & Co., of Blagovestchensk.’

## OPPOSITION TO FOREIGN WORKMEN.

Some trouble has arisen over the arrival of a dozen hatters from England under contract to a Sydney manufacturer, and their landing was opposed by the labour union on the ground that their doing so would be a contravention of the Immigration Restriction Act. After some negotiations they were permitted to land. The clause of the Act reads :—

‘The immigration into the commonwealth of the persons described in any of the following paragraphs of this section (hereinafter called ‘prohibited immigrants’) is prohibited, namely :—

‘(g.) Any persons under a contract or agreement to perform manual labour within the commonwealth. Provided that this paragraph shall not apply to workmen exempted by the Minister for special skill required in Australia, or to persons under contract or agreement to serve as part of the crew of a vessel engaged in the coasting trade in Australian waters, if the rates of wages specified therein are not lower than the rates ruling in the commonwealth.’

Occasionally Canadians have come here under conditions that would have brought them under the terms of this Act. In the future it would be advisable to get permission of the government of the commonwealth to land before leaving Canada.

## SYDNEY WOOL SALES.

The Sydney wool sales have closed for 1902. The number of bales catalogued from June to December was :—

|           |         |
|-----------|---------|
| 1901..... | 295,864 |
| 1902..... | 181,637 |

Showing a decrease of 114,227 bales. It is estimated that the total production of wool in Australia will fall short of last year by three hundred thousand bales or nearly 20 per cent. Owing to the small lambing this year, and the number of sheep which perished since shearing, it is feared that the production next year will be below that of this. In such case the high prices obtained and likely to be obtained will be a considerable compensation.

I have the honour to be,

Your obedient servant,

J. S. LARKE.

## (B.)—NORWAY, SWEDEN AND DENMARK.

## REPORT OF COMMERCIAL AGENT.

*(Mr. C. E. Sontum.)*

CHRISTIANA, Norway, January 8, 1903.

The Right Honourable  
The Minister of Trade and Commerce,  
Ottawa.

SIR,—I herewith have the honour to forward report for the quarter ending December 31, 1902.

Trade in general has continued slack during the past year, which is only a natural consequence of the poor times since the financial crack three years ago, and also on account of the very small crops harvested last year in both of the Scandinavian countries. In the northern part of Sweden the entire crop failure has caused a famine, which only partly can be reduced by large government and private donations.

The depression in the freight market also makes a great difference in the amount of remittances which the shipowners receive.

The industries which supply the home market have had a poor year, probably worse than in 1901, and as building operations have been greatly curtailed and log felling will be restricted also the coming winter, the number of unemployed is unfortunately large. The outlook is thus not a cheerful one, and a revival of trade is not to be expected for some time.

## WOOD GOODS EXPORTERS.

The Swedish, Finnish and Norwegian wood goods exporters decided in the autumn of 1901 to reduce their log-get during the following winter by upwards of 40 per cent. In Norway the actual reduction has been found to be 35 per cent. This step had become a necessity, because prices had been demoralized under the weight of the excessive production. Neither could the forests for any length of time have suffered such a depletion. Stocks are now very small and fair prices are obtained.

## WOOD PULP.

Wood pulp which in the beginning of 1902, sold at 35 kr. (\$9.33) for good ordinary brands of moist mechanical advanced as high as to 40 kr. (\$10.67) during the month of March, but has later gradually dropped until recently sales have been made at 29 kr. (\$7.60).

Cellulose has been a bad market all through the year, and the price has been declining almost constantly until the position has now become worse than anybody in this trade can remember. I mention the above facts, as it may possibly be of interest to the Canadian exporters in these lines to see just how the market stands at present.

## COD FISHERIES.

The returns of the cod fisheries for the past year amount to about 44,000,000 of cod as compared with 40,000,000 in 1901 and about 53,000,000 averagely for the preceding ten years.

## RUBBER SHOES.

During the past quarter my firm has besides other Canadian manufactures also had a first trial shipment of about forty cases of rubber shoes from a Canadian rubber

manufacturer. If the prices compare favourably with prices on some kind of goods from United States manufacturers, further and larger business will no doubt result. As to quality, I am perfectly satisfied that the Canadian goods will stand comparison. On account of the heavy duty only lighter and finer grades can be imported to advantage.

#### NEW INVENTION.

Mr. T. A. Fidjeland, the gunmaker, who is well known outside of this country on account of his late patents for rifle construction, has recently made another invention, which according to the judgment of professionals, is very practical, and which will no doubt be of interest also in Canada. It is a stream motor, which is put in movement by being placed in running water. It frequently happens that there is a river where the stream is strong, but where the fall is divided on a longer distance, so it would be connected with large expences to build a dam or put up turbine pipes. Mr. Fidjeland's invention will save such constructions, when it is desired to procure power at a small expense. His stream-motor, which is constructed similar to a common three-bladed steamship propeller, is placed in the stream and is turned around by the pressure of the running water.

#### PRACTICAL USE OF INVENTIONS.

Mr. Fidjeland has found out that by placing several such propellers on one axle in a proper distance from each other, the power is multiplied. In this manner sufficient power may be realized for running smaller saw-mills, factories, electrical light plants, threshing machines, &c. The inventor has, since the patent became known, received hundreds of orders from farmers and others, who have seen his own motor at work at his factory. The motors are in every instance said to work very well and give entire satisfaction.

I have the honour to remain, sir,

Your obedient servant,

C. E. SONTUM.

## IV.—GENERAL COMMERCIAL INFORMATION.

### (A.)—IMPORTS OF PRINCIPAL FOODSTUFFS INTO GREAT BRITAIN.

QUANTITIES of Butter, Cheese, Bacon, Hams, Fish, and Eggs, Imported into Great Britain during the *months* of December and the *twelve months* ended December 31, 1900, 1901 and 1902. (*From British Returns.*)

## (B.)—INQUIRIES RELATING TO CANADIAN TRADE.

Since the publication of the last monthly report, there have been received at this department from the High Commissioner for Canada, London, England, and the Curator, Canadian section, Imperial Institute, London, England, the following inquiries relating to Canadian trade. The names of the firms making these inquiries, together with their addresses, can be obtained from this department, or from the office through which the inquiry was received.

**Inquiries from the High Commissioner for Canada.**INQUIRY *re* THE SALE OF TABLE SAUCERS IN CANADA.

1. The makers of table saucers make inquiry respecting the sale of their manufactures in Canada. (Reference No. 68.)

## CANADIAN EXPORTERS OF CANNED LOBSTERS, FRUITS, FLOUR, ETC.

2. An old established firm of commission merchants in London with an extensive London and British connection would like to be placed in communication with one or two good firms of exporters of canned lobsters, fruits, flour, bacon, hams, cheese, &c. (Reference No. 68.)

## CANADIAN IRON AND METAL FOUNDERS.

3. The manufacturers of moulding and core making machines ask to be placed in communication with Canadian iron and metal founders. (Reference No. 68.)

## CANADIAN IMPORTERS OF HATTERS' FUR AND MATERIALS.

4. A manufacturer of hatters' fur and materials (trimmings) contemplates opening up a trade with the Dominion, and asks for information regarding the trade. (Reference No. 68.)

## CANADIAN MANUFACTURERS OF FOOD PRODUCTS, AGRICULTURAL MACHINERY, ETC.

5. A Johannesburg firm is desirous of taking up agencies for Canadian exporters of food products, agricultural machinery, &c. (Reference No. 68.)

## AGENCY IN CANADA FOR BRITISH MANUFACTURES OF DRY GOODS.

6. A selling agent in Montreal is open to represent British manufacturers of the following lines:—Linen and other threads, twines, thread or leather boot and shoe laces, hosiery, woollens, dress goods, quilts. (Reference No. 68.)

## CANADIAN SHIPPERS OF FLOUR, CHEESE, ETC.

7. A commission agent in Belfast, with excellent Irish connections, would like to hear from Canadian shippers of flour, cheese, hams, fruit, canned goods, hay, &c., also from manufacturers of furniture, who desire to be represented in Ireland. (Reference No. 69.)

## AGENCY FOR CANADIAN WOOD OVERMANTEL MAKERS.

8. The agency in the United Kingdom for a Canadian firm of wood overmantel makers is wanted by a person qualified to undertake this business. (Reference No. 69.)

## CANADIAN SHIPPERS OF HAY AND OATS.

9. The names of some reliable Canadian shippers of first-class hay and oats are required by a North of England correspondent who is also interested in the wood-pulp business. (Reference No. 69.)

## CANADIAN EXPORTERS WISHING REPRESENTATION IN LONDON, E.C.

10. Application has been made for a list of provision and flour exporters in Canada who require representation in London. (Reference No. 69.)

## CANADIAN MANUFACTURERS OF CIDER AND PERRY.

11. A firm of cider and perry merchants desires to get into touch with Canadian manufacturers of cider who may wish to find an outlet for their product in the United Kingdom. (Reference No. 69.)

## SCRAP IRON AND STEEL DEALERS.

12. A correspondent in Ontario will be glad to hear from dealers in scrap iron and steel, with price per gross ton delivered in Canada. (Reference No. 69.)

## CANADIAN SHIPPERS OF CANNED EGGS, APPLES, ETC.

13. A Glasgow firm has asked to be referred to one or two shippers of canned eggs from Canada, inquiries for these being frequently made by bakers and confectioners. The packages should run from 7 lbs. to 14 lbs. and 28 lbs. The same house is prepared to take gallon apples, dried apples, and other preserved fruit. (Reference No. 70.)

## AGENCY IN CANADA FOR TUBULAR RIVETS, STUDS, ETC.

14. A London firm manufacturing tubular rivets and lacing studs for boots and shoes, contemplate appointing an agent to represent them in the Dominion. (Reference No. 70.)

## CANADIAN MANUFACTURERS OF FLOUR AND CHEESE.

15. A firm which buys for the South African market asks for quotations for Canadian flour and cheese. (Reference No. 70.)

## CANADIAN EXPORTERS OF FOODSTUFFS.

16. A Bordeaux firm is open to take the French agency of Canadian exporters of foodstuffs and articles for every-day use. (Reference No. 70.)

## CANADIAN SHIPPERS OF CANNED GOODS ALSO IMPORTERS OF CANNED PINES, ETC.

NOTE.—‘Special’ means in the case of Imports, ‘Imports for Home Consumption,’ in case of Exports, ‘Exports of Domestic Produce and Manufacture.’  
a The figures for Mexico include coin and bullion.  
\* Figures are for the Years 1901, 1902 and 1903.

II---NEW TARIFFS.

During the month under review there have been distributed from this department to all the principal Customs-houses and Boards of Trade throughout the Dominion, copies of all foreign and colonial tariffs and supplements thereto, as furnished during that period by the International Customs Tariff Bureau, which are always available for reference by those interested therein, resident at the principal centres of trade. The following British and Colonial are supplemental to those published in the departmental Annual Report, 1893, and the quarterly and monthly reports since published, and comprise all additions thereto or changes therein, so far as the department has authentic advice.

ANTIGUA.

ORDINANCE No. 3, 1903.

(Assented to on January 8, 1903.)

The present ordinance repeals the Customs Tariff Ordinance, No. 8 of 1901, and the Additional Duty Ordinance, No. 1 of 1902, but at the same time provides for the imposition of duties on goods imported into the Presidency of Antigua, as well as for drawbacks upon goods exported therefrom.

The ordinance may be said to consolidate, to a large extent, the rates imposed by the tariff ordinances previously in force, and it is to remain in operation to December 31, 1903, and thenceforth to the next meeting of the Legislative Council. The tariff of import duties is now given *in extenso* for the purpose of reference :—

## FREE LIST.

All samples not of saleable value, of manufactured and other goods, and all articles intended for exhibition only, and not for sale, which the treasurer in his discretion shall allow to be imported, and subject to any rules that may be made.

Goods, being the growth, produce or manufacture of, or raised in any of the islands comprising the colony of the Leeward islands and goods upon which duty shall have already been paid in any Presidency of the colony, except Dominica, with certain provisos.

\* Consular articles imported for the official use of the Consulate, of any foreign country or place, provided that a similar privilege in respect of similar articles is accorded by the laws and customs of such foreign country or place to H. M. Consulate therein.

\* Naval stores for the use of the Admiralty.

\* Public worship and education, articles specially imported for, viz.:—musical instruments of all kinds, lamps, bells, wine and ornaments, and all furniture and articles to be used in the celebration of divine worship, and all goods imported for the use or repair of churches, chapels and duly certified school houses.

\* Shipbuilding materials and accessories of all kinds when imported for the construction, equipment or repair of a specific vessel above five tons burden, except rope and cordage of all kinds, including wire rope.

\* Steam engines and steam pipes, boilers and boiler tubes, firebars, machinery and apparatus, whether stationary or portable, for agriculture, irrigation or mining, and all necessary parts and appliances for the erection or repair thereof, or for the communication of the motive power thereto, when not imported for sale.

\* Stores of every description imported or supplied for the use of H. M. land and sea forces, military uniforms, accoutrements and equipments imported with the authority of the commanding officer by members of the Defence Force for their own use, all goods or stores imported by the St. John's city board for municipal purposes of the board, and all things imported by or supplied for the use of the governor.

If any goods on which duty has been paid at the time of importation be subsequently supplied to or for the use of the Governor, or H. M. land and sea forces, the amount of duty paid on the goods so supplied, shall be repaid out of the treasury upon the warrant of the Governor.

\* Surgical instruments and appliances imported for the use of the importer.

\* Triple effect for manufacturing sugar, all multiple effect machinery and materials, appliances and plant and parts thereof required to erect or enlarge or improve a factory wherein a multiple effect is installed.

Animals, sucking.

Baggage, personal, of passengers, containing apparel and articles of ordinary use.

Books, printed, pamphlets and printed matter; bullion; eggs; fertilisers of all kinds and manures; fish, fresh or on ice; forage; fruits and vegetables not being preserved, except potatoes other than sweet potatoes; furniture for owner's use—the property of persons coming to reside in the Presidency which is imported by them for their personal use and which has been in their use for not less than one year previously to the importation thereof; goats; gold in bars, plate or wire; ice; maps and charts; music printed; packages, viz., boxes, barrels, crates, and inner packages of all kinds, also packages and coverings (except butts, puncheons, hogsheads, tierces and trunks) in which goods are actually imported and returned packages which have been exported with molasses therein; plants, shrubs and seeds of all kinds for planting; poultry.

Repairs.—Articles or goods which are exported for repairs or alteration and are subsequently reimported, provided that notice of the intention to export such articles or goods was given to the treasurer at the time of exportation.

---

\*In these cases the importer is required to furnish a certificate to the treasurer specifying the particular purpose for which the goods have been imported, and also stating that they will not be disposed of for any other purpose without the consent of the treasurer.

Salt ; sheep ; specimens illustrative of natural history ; swine ; tombstones, tablets and railings for graves ; turtle ; vegetables, green, other than those specified.

Workmen's tools and professional apparatus when brought by a passenger for his own use.

It is also provided that where any goods imported at one time of a total invoice value of 50*l.* or upwards have been damaged in transit, the treasurer may allow a rebate of duty proportionate to the damage done to be recovered on an *ad valorem* equivalent which is set out in the ordinance.

Provision is also made (subject to certain conditions) for a drawback of duty to be allowed on the exportation of imported dutiable goods.

### III.—COMMERCIAL AGENCIES.

The following Canadian Commercial Agents (whose addresses are given) will answer correspondence relative to commercial and trade matters, and give information to those interested as to local trade requirements in the districts they represent.

Such reports of general interest as have been received from them since the publication of the last monthly report of this department are appended.

J. S. Larke, Sydney, N.S.W., agent for Australasia.

James G. Jardine, Cape Town, South Africa, agent for South Africa.

G. Eustace Burke, Kingston, Jamaica, agent for Jamaica.

Robert Bryson, St. John, Antigua, agent for Antigua, Montserrat and Dominica.

S. L. Horsford, St. Kitts, agent for St. Kitts, Nevis and Virgin Islands.

Edgar Tripp, Port of Spain, Trinidad, agent for Trinidad and Tobago.

C. E. Sontum, Christiana, Norway, agent for Norway, Sweden and Denmark.

A. D. Campbell, Buenos Ayres, agent for Argentine Republic and Uruguay.

A. Poindron, 10 Rue de Rome, Paris, agent for France.

Peter B. Ball, agent for Birmingham, Birmingham, England.

In addition to their other duties, the undermentioned Canadian agents will answer inquiries relative to trade matters, and their services are available in furthering the interests of Canadian traders :—

W. L. Griffith, 17 Victoria Street, London, S.W., England.

Harrison Watson, Curator for Canadian Section, Imperial Institute, London, England.

G. H. Mitchell, Newton Chambers, 43 Cannon St., Birmingham, England.

John Webster, 52 St. Enoch Square, Glasgow, Scotland.

Alfred Jury, Old Castle Buildings, Preeson's Row, Liverpool, England.

C. R. Devlin, 14 Westmoreland Street, Dublin, Ireland.

Edward O'Kelly, 13 Queen's Square, Belfast, Ireland.

D. Treau De Coeli, 75 Marché St. Jacques, Antwerp, Belgium.

#### (A.)—AUSTRALASIA.

##### REPORT OF COMMERCIAL AGENT.

(*Mr. J. S. Larke.*)

SYDNEY, N.S.W., January 24, 1902.

The Right Honourable

The Minister of Trade and Commerce,  
Ottawa.

SIR.—The rains of November and December have been followed by exceedingly hot weather with scorching winds, which undid the advantages of the rain in many sections of New South Wales. The growing grass has withered and the maize crops shrivelled as by a flame. The other States have not suffered to the same extent. If good rains should fall during the next week, and in February, a great spring of grass will follow and to a large extent the damage will be repaired.

##### WHEAT AND FLOUR.

The experts are still estimating as to the Australian wheat crop, but the latest figures confirm the view taken in my report of the first of December last, that Australia

would require about ten million bushels to supply its demand. It is supposed that about 130,000 tons of wheat and flour have been ordered, leaving about 170,000 tons yet to be bought. Nearly all the flour purchased is strong wheat flour, but the wheat is largely softer wheat from California. The causes contributing to this is that the local mills are equipped better for grinding the soft wheat, and the offal is more valuable than that from Manitoba hard. The mixture used for bread is about one-third or one-fourth Manitoba flour, balance from soft wheat, and it is easier to mix the flour than to grind hard and soft wheats together. The anomaly noticed in my last report that the space of the regular steamers has been taken for months ahead continues, and yet it is difficult to get loading for an extra ship. This is due to the fact that New York is a cheaper port in which to buy Manitoba wheat, and flour made from it in United States mills, than Vancouver. There is a growing hesitation to attempt business via Vancouver, from the lack of success of experiments made, and some errors committed both here and in Vancouver, but the whole of the blame here is shouldered on the Canadian firms. Large orders yet must be given during the year, and I trust that circumstances will be changed so as to favour the Canadian ports on the Pacific getting a good share of them.

#### OATS.

A good deal of inquiry both by letter and cable has characterized the past month, but I fear it is too late to do much now. So far the market has been, as my cable of November indicated 'firm till March'. They have risen in price, and for best oats a dollar per bushel has been paid. No quantity can be obtained here from Canada until after March, and when the New Zealand oats come into this market—as they will in March—a heavy reduction in price is expected. The data for calculating the prospects of the market throughout the year are not at hand, but the position just now appears to be that New Zealand will reap sixteen per cent more acres this year than last, but the yield will not be quite so good. She expects a harvest of sixteen to eighteen million bushels. She could if necessary spare about eight million bushels. In 1901, out of a somewhat larger yield, she exported ten and a half million bushels, of which over eight millions went to South Africa, and less than two to Australia. The Australian harvest of 1900-1 was twelve million bushels, this is 'guessed' at six and a half million bushels. Apparently the New Zealand surplus will about meet the Australian requirement. But the Australian maize crop is likely also to be a short one, to what extent is not yet clear. It is reasonable to fear that it may be at least three million less than 1900-1. So will the crop of wheaten and oaten hay, and even if the grass be good the shortage in maize must be made up in hay or oats, and the problem is whether it is to come from Argentine as maize or Canada as oats. Argentine maize is not a first-class article. It is quoted here, duty paid, 4s. 5d. as against 5s. 3d. for good local. Oats are quoted at 3s. 6d. to 4s. 1d. per bushel. It is possible, therefore, that towards the close of the year there may be an opening for a considerable quantity of Canadian oats, but unless there is a poorer crop both here and in New Zealand than is now looked for, there is not much hope until that time.

#### PREJUDICE AGAINST DIRECT TRADE.

I have alluded to errors which have created a disinclination in some circles to do business with Canada direct. One of these told me that an Australian firm bought a quantity of oats to come by steamer and sent a letter of credit. On receiving the money the Canadian firm found that no space was available on the steamer, and without consulting the buyer shipped by a sailing vessel, which may come here late in March or April. The firm are likely to be compelled to sell at a loss. If this be the case, the Canadian firm has paid no attention to the conditions here, and has blundered (with the best of intentions, no doubt) and thereby created a prejudice against direct trade. This is not applicable all, for there are firms against whose methods of doing business not a complaint has been heard. It illustrates the necessity of studying the conditions

here, and never varying the implied terms of a contract without the consent of the purchaser.

## FROZEN POULTRY.

Over ten tons of frozen turkeys and geese arrived here from Smith's Falls by the *Aorangi*. It was perfectly preserved and as sweet as when killed. As a whole it was a very nice lot, a few birds, however, being thin. A morning newspaper said of it:—

'A striking commentary on all our talk of a poultry and other meat export trade was witnessed through the Sydney streets during the past week in the form of a number of lorry loads of frozen pork, turkeys and geese being conveyed from the Canadian steamer to a city cold store. On Saturday last a number of the turkeys were displayed in a King street poulterer's shop, and a splendid sight they were. There have been larger turkeys put on the Sydney markets locally, but the quality of the Canadian out-classes anything yet seen in a Sydney shop. They are birds of, say from 10 to 14 lbs. each, back as well as breast showing a wealth of meat, and which was only brought about by the most careful feeding, as opposed to the system in this state of allowing the turkeys to wander in search of their own living. The birds are offered at 1s. 6d. per lb. retail, a price below that obtaining in Sydney prior to Christmas, and had these importations been available at such time a speedy clearance would have been effected.'

They justified this opinion. Nevertheless there were some criticisms. Some of the turkeys had been plucked badly, large strips of the skin having been torn away in the act. One of the finest birds in the shipment had a strip as large as the palm of a hand thus stripped. This careless work damages the value of the turkey. When four or five dollars are paid for one, appearance is an important element to be considered. The packing cases, though of the right shape, were light. They were scarcely strong enough for the long distance, and should have been reinforced by a wire fastened tightly around each end. A few broke on the way, but not very badly. The Australians who have had experience in long distance transportation, pack poultry in cases very much the shape of the Canadian, but they are lined inside with thin cotton, which, though permeable to the air, stop a good deal of the dust. The broad top and bottom have each an extra layer of cotton with parchment or grease proof paper between. This protects the birds and adds to their appearance at the sale rooms. The openings in the sides are said to be sufficient for the circulation of cold air in the cool chambers. The superiority of the turkeys to the Australian at Christmas time will make shipments for the holiday season profitable for some years to come. For the three years during which I have endeavoured to get such a trade initiated, it certainly would have been profitable.

## FROZEN HOGS, &amp;C.

Orders have been given to Canadian firms for continued shipments of frozen hogs. The shipment by the last steamer has been declared by the buyer superior to the hogs from Chicago, though some of them were rather heavy. Owing to the limited space in the cool chambers of the Pacific steamers, shipments have been made from Chicago via New York and England to Australia. Prices are, therefore, kept down to twelve to thirteen cents C. I. F.

Barley, peas and beans are still high, but I have not succeeded in getting a sample from Canada.

## PACIFIC CABLE.

Though the cable is getting a good deal of business, it is not getting its full share. As the result of having the special use of land lines and the right to open its own office in this city, the Eastern Extension Company register cable addresses free, while the Government Telegraph Department still charges 2s. 6d. per month or 10s. 6d. per annum for such registration. The Eastern Extension is therefore getting the business

of firms which, were it not for this tax, would send their business over the Pacific Cable. A still greater hindrance to the increase of business is that Australian firms are not aware whether their foreign correspondents are registered with the Pacific Cables agents. They know that they are with the Eastern Extension, and send their messages accordingly. The difficulty respecting sending time of receipt of cable has been overcome. With these exceptions the service is well spoken of.

I have the honour to be,

Your obedient servant,

J. P. LARKE.

## SOUTH AFRICA.

### REPORT OF COMMERCIAL AGENT.

(*Mr. J. G. Jardine.*)

22 & 23 HUGUENOT BUILDINGS,  
QUEEN VICTORIA STREET,  
CAPE TOWN, Jan. 13, 1903.

The Right Honourable,  
The Minister of Trade and Commerce,  
Ottawa, Canada.

SIR,—Now that Mr. Chamberlan and the Rand Magnates have finally arranged to the satisfaction, at any rate, of the Transvaal, their percentage of the war debt, it is confidently expected that the new colonies will advance with rapid strides, and business everywhere will greatly improve, and that before very long the Cape, Natal, Transvaal, Orange River Colony and Rhodesia will be incorporated into a united commonwealth. The first step leading to federation will be the formation of a customs union. The Cape Colony imposes heavy duties on food stuffs, about \$4,000,000 of taxes alone last year were collected on the necessaries of life, a crushing burden to the middle and working classes of the Cape.

### PROPOSED CUSTOMS UNION.

The Transvaal Government by their new tariff has done much in the direction of lower duties and the Government of Cape Colony is at last willing to discuss a customs union with her sister colonies. Sir Gordon Sprigg, the Prime Minister, himself is in favour of working on similar lines to Canada's preferential tariff, favouring the Mother Country and giving a preference to the Empire at large.

### SEABOARD FREIGHT.

The railway companies are now in a position to move freight from the sea board more expeditiously. This is proving a great benefit to the business community generally.

### MORE CANADIAN GOODS WANTED.

In timber, flooring and ceiling boards, doors and window sashes, railway sleepers, &c., the supply is not equal to the demand. A very largely increased want for strong,

medium priced, household furniture and office requisites has arisen and inquiries are coming in for the names and addresses of Canadian manufacturers in these cheaper grades. Our Canadian timber and furniture manufacturers should take note of this fact. In the more expensive furniture including musical instruments and pianos I am told the stock on hand is greater than the sales warrant.

#### ARRIVAL OF CANADIAN GOODS.

The ss. *Melville*, the second of the Canadian direct line reached Cape Town, January 1, bringing a full cargo consisting of flour, grain, butter, cheese, deals, timber, bran, pease, apples, poultry, canned meats, vegetables, lobster, fodder, sole leather, organs, church sittings, shoes, roofing, railway ties, stoves, earthenware, linotypes, furniture and office desks, carriages and buggies. The perishable goods, including apples, arrived in excellent condition, and are likely to lead to increased exports of these and other articles from Canada. Unfortunately the *Melville* had to await her turn for dockage accommodation, and it will be a few days yet before she leaves for East London and Durban ports. We are daily looking for the arrival of the third vessel, reported to have left St. John, December 18, with a full cargo of food and other Canadian products aboard.

#### THE TRANSVAAL BUDGET.

The first Transvaal budget was issued by the official 'Gazette' on December 31 for the financial year ending June 30, 1902. The revenue for the year is estimated at \$27,863,220 and the expenditure at \$27,254,645, showing a surplus of over half a million dollars.

#### ORANGE RIVER REVENUE.

In the Orange River Colony the year's revenue would be \$3,865,000 and the expenditure \$3,800,000, leaving a surplus of \$65,000. The revenues in both colonies are both largely in excess of what they were in the last year of the old administrations. The figures indicate that trade is expanding in the new colonies. Now that the war is over the people are settling down once more to their industrial pursuits. It should tend to increase trade relations with Canada if her business men are prepared to exploit this market and adopt some of the methods of their neighbours to the south.

#### COMMERCIAL TRAVELLERS TAX REPEALED.

The Government of the Orange River Colony has been the first to repeal the iniquitous commercial travellers tax and it is to be hoped that all the other colonies will soon follow suit.

#### SALE OF CANADIAN PRODUCE.

Canadian tinned goods, including salmon, lobster, kippered herring, tomatoes, pease, soda biscuits, &c., are on sale here, and Canadian butter and cheese brought by our direct line are also selling very well. The grocers tell me our butter, out of cold storage, stands the climate better than Australian or Argentine on account of the extra salt it contains. It does not however retail for more than 1s. 6d. per pound in Cape Town, whereas Australian and Argentine, perhaps on account of less salt, or for some other reason sells for 1s. 9d. per pound. Canadian bacon and hams ought to find a good market here. The American article is sold here for the genuine English product at 1s. 4d. to 1s. 10d. per pound.

#### CANADIAN AGENTS IN SOUTH AFRICA.

One company of extensive Canadian packers have given their agency to a responsible and pushing firm of commission merchants with branches at every important point

in South Africa and very soon the wisdom of their move will be apparent. Other Canadian firms are waking up to the importance of the South African market and have representatives already on the ground.

#### BRITISH COLUMBIAN ENTERPRISE.

The British Columbians under the leadership of a few keen Vancouver merchants are turning their attention to South Africa. They object to the United States and Eastern Canada doing all the exploiting, and are determined themselves to build up a trade in lumber, woodenware and canned products generally with South Africa; and judging from the correspondence I get from that quarter I take it these Vancouver gentlemen mean business and lots of it.

#### RHODESIAN PROGRESS.

Rhodesia is making steady progress, if her customs statistics are to be the gauge. In 1895 her imports amounted to \$1,050,000. In 1901 they had reached \$4,214,815 and for the year ended March 31, 1902, they had increased to \$8,032,000. The duties levied averaged  $7\frac{3}{4}$  per cent. The gold output in Rhodesia since September, 1898, to April, 1902, is valued at \$7,200,000. So far as I know Canada did not sell anything to Rhodesia last year. I propose to extend my trip to this young province when I leave for the Transvaal next month and shall endeavour to learn the cause.

I have the honour to be, sir,

Your obedient servant,

JAS. G. JARDINE.

# IV.—GENERAL COMMERCIAL INFORMATION.

## IMPORTS OF PRINCIPAL FOODSTUFFS INTO GREAT BRITAIN.

QUANTITIES of Butter, Cheese, Bacon, Hams, Fish, and Eggs, Imported into Great Britain during the *months* of January and the *twelve months* ended January 31, 1901, 1902 and 1903. (*From British Returns.*)

## INQUIRIES RELATING TO CANADIAN TRADE.

Since the publication of the last monthly report, there have been received at this department from the High Commissioner for Canada, London, England, and the Curator, Canadian section, Imperial Institute, London, England, the following inquiries relating to Canadian trade. The names of the firms making these inquiries, together with their addresses, can be obtained from this department, or from the office through which the inquiry was received.

**Inquiries from the High Commissioner for Canada.**

## AGENCY IN ENGLAND FOR CANADIAN CANNED GOODS.

1. A firm of commission merchants offering good references is desirous of obtaining the representation for England of Canadian packers of canned goods or other produce. (Reference No. 72.)

## AGENCY FOR CANADIAN CARRIAGES, IMPLEMENTS, ETC. (S. AFRICA.)

2. A gentleman with experience about to take up residence in South Africa desires to be placed in communication with Canadian manufacturers of carriages, farm wagons, implements, etc., with a view to securing agencies. (Reference No. 72.)

## INQUIRY FOR CANADIAN EXPORTERS OF STURGEON'S ROE FOR CAVIARE.

3. Two further inquiries have been made for names of Canadian exporters of sturgeon's roe for caviare. (Reference No. 72.)

## CANADIAN EXPORTERS OF TIMBER.

4. A London firm of wholesale and export cabinet-makers is desirous of being placed in direct touch with Canadian exporters of timber suitable for their trade. (Reference No. 72.)

## CANADIAN IMPORTERS OF SCOTCH LIQUORS.

5. A Scotch firm of distillers makes inquiry for Canadian houses importing liquors with which it might do business. (Reference No. 72.)

## AGENCY IN GLASGOW FOR CANADIAN CANNED GOODS.

6. An agent in Glasgow wishes to get into touch with first-class Canadian house exporting canned fruits, principally gallon apples. (Reference No. 72.)

## CANADIAN EXPORTERS OF MICA AND ASBESTUS.

7. A Scotch firm wishes to open up direct business relations with owners of mica and asbestos mines who are in a position to offer large quantities for export. (Reference No. 72.)

INQUIRY *re* THE MANUFACTURE OF HEAVY JUTE CLOTH.

8. Inquiry is made by a Canadian house for addresses of makers of heavy jute cloth such as is used in the manufacture of brattice cloth. (Reference No. 72.)

## BRITISH IMPORTERS OF MAPLE SUGAR AND SYRUP.

9. A Quebec packer asks what opening exists in Great Britain for Canadian maple sugar and maple syrup. (Reference No. 72.)

## AGENCY IN BRISTOL FOR CANADIAN PRODUCE.

NOTE.—‘Special’ means in the case of Imports, ‘Imports for Home Consumption,’ in case of Exports, ‘Exports of Domestic Produce and Manufacture.’  
a The figures for Mexico include coin and bullion.  
\* Figures are for the Years 1901, 1902 and 1903.

## II.—COMMERCIAL AGENCIES.

The following Canadian Commercial Agents (whose addresses are given) will answer correspondence relative to commercial and trade matters, and give information to those interested as to local trade requirements in the districts they represent.

Such reports of general interest as have been received from them since the publication of the last monthly report of this department are appended.

J. S. Larke, Sydney, N.S.W., agent for New South Wales, Queensland, and New Zealand.

D. H. Ross, Melbourne, Victoria, agent for Victoria, South Australia, Western Australia and Tasmania.

James G. Jardine, P. O. Box 1232, Cape Town, Cape Colony, agent for South Africa.

Peter B. Ball, Birmingham, England, agent for Birmingham.

A. Poindron, 101 Rue Réaumur, Paris, France, agent for France.

G. Eustace Burke, Kingston, Jamaica, agent for Jamaica.

Robert Bryson, St. John, Antigua, agent for Antigua, Montserrat and Dominica.

S. L. Horsford, St. Kitts, agent for St. Kitts, Nevis and Virgin Islands.

Edgar Tripp, Port of Spain, Trinidad, agent for Trinidad and Tobago.

C. E. Sontum, Christiana, Norway, agent for Norway, Sweden and Denmark.

A. D. Campbell, Buenos Ayres, Argentine Republic, agent for Argentine Republic and Uruguay.

In addition to their other duties, the undermentioned Canadian agents will answer inquiries relative to trade matters, and their services are available in furthering the interests of Canadian traders :—

W. L. Griffith, 17 Victoria Street, London, S.W., England.

Harrison Watson, Curator for Canadian Section, Imperial Institute, London, England.

G. H. Mitchell, Newton Chambers, 43 Cannon St., Birmingham, England.

Alfred Jury, Old Castle Buildings, Preeson's Row, Liverpool, England.

John Webster, 52 St. Enoch Square, Glasgow, Scotland.

Edward O'Kelly, 14 Westmoreland St., Dublin, Ireland.

D. Treau De Cœli, 75 Marché St. Jacques, Antwerp, Belgium.

### GREAT BRITAIN.

#### REPORT OF THE CANADIAN HIGH COMMISSIONER

*(The Right. Hon. Lord Strathcona, G.C.M.G., &c., &c.)*

17 VICTORIA STREET,

LONDON, S.W., February, 1903.

The Right Honourable

The Minister of Trade and Commerce,  
Ottawa, Canada.

SIR,—I beg to submit my Annual Report on matters connected with the Trade of the Dominion for 1902, so far as it comes within the purview of my department.

In the first place, it may be stated that the correspondence in the general branch of the office, which deals largely with commercial matters, numbered 8,293 letters

received, and 9,526 forwarded. In addition, our callers during the year numbered about 15,500, of whom 4,150 were Canadians who registered. A considerable proportion of the remainder consisted of persons enquiring about commercial and other questions, members of the Press, and those desiring to consult the Library, to see the newspapers, and to make general inquiries.

The official correspondence—that with the Departments at Ottawa, and with those of the Imperial Government—was also large. Some of it related to the purchase in Canada of supplies for use in South Africa, but the work of this branch of my department has been dealt with in another report.

#### ADVERTISEMENT DEALING WITH CANADA.

During the year, the following advertisements have been appearing in the various trade papers :—

(1.) **TRADE WITH CANADA.**—Firms or persons requiring any information respecting the import or export trade of Canada, are invited to communicate with the High Commissioner for Canada, 17 Victoria Street, London, S.W.

(2.) **OPENINGS FOR TRADE WITH CANADA.**—Canada exports live cattle, meats, including bacon and hams, wheat, flour, oats, barley and other grains and cereals, butter, cheese and eggs, fruits and farm and dairy produce of every description. Also the products of the mines, forest and fisheries, and manufactures. The import trade includes all kinds of manufactured goods. Full information on matters connected with both the import and export trade of Canada, and the preferential tariff in operation in favour of British goods, may be obtained at the office of the High Commissioner for Canada, 17 Victoria Street, London, S.W.

(3.) **CANADIAN WOOD PULP SUPPLIES.**—Best and cheapest raw material to be had in Canada. Cheap and abundant water power; cheap transportation facilities. Canada offers unexcelled openings for the investment of capital in the manufacture of wood pulp and of paper. Apply for official pamphlets (illustrated), respecting Canadian wood pulp industry and the forest wealth of Canada, to the High Commissioner for Canada, 17 Victoria Street, London, S.W. Correspondence on all matters relating to Canadian trade is invited.

As the result there are daily many inquiries at the office, both by letter and in person, on commercial matters.

#### MEDIUM OF INFORMATION.

It is also very generally known in Canada now, that the services of the Department are available for the supply of information and reports to Canadian merchants and shippers, importers and exporters, who are interested in the trade in the United Kingdom and on the Continent. It cannot be too widely understood that we are able to place importers and exporters in this country in communication with importers and exporters in Canada, and *vice versa*, and there is reason to believe, from statements made to me personally and in the course of our correspondence, that our efforts in this direction have been appreciated.

#### COMMERCIAL INQUIRIES.

For some years past also, it has been my practice to publish a summary of the commercial inquiries we receive each week, both from the United Kingdom, the continent, and Canada, in the newspapers in this country and in the Dominion. Of course, before this is done, many of the inquiries are under investigation or have been dealt with, but it is useful as stimulating correspondence and increasing the list of the names of those in my possession who are interested in such matters.

## THE IMPERIAL INSTITUTE.

Similar work, but naturally on a smaller scale, is done at the Imperial Institute ; and it is anticipated as the result of the new arrangements by which that institution has been placed under the control of the Board of Trade, and offices opened in the city, that this additional means of obtaining publicity for the resources and capabilities of Canada, both as regards her import and export trade, will be beneficial, and promote the still further expansion of trade.

## CORRESPONDENCE INVITED.

While dealing with this branch of the subject, I may say, that the more correspondence that is received on commercial matters, both from Canada and the United Kingdom, the better. There is a growing desire in this country, as shown in our correspondence—to increase the trade exchanges between Canada and the United Kingdom, and to give the preference to the products of the Colonies—all other things being equal as regards prices and quality.

## INFORMATION FURNISHED BRITISH PRESS.

In order to attract as much attention as possible to Canadian Trade, a letter was addressed to the Press of the United Kingdom in November last—which was printed in almost every important paper in the country—and it attracted much attention.

The following is the letter in question :—

“ You have been good enough, on more than one occasion, to permit me to direct attention, through your columns, to the interchange of trade between Canada and the United Kingdom, and I venture once more to crave your indulgence.

“ It is generally well-known that, for some years past, the exports of the produce of the Dominion to the mother country have been rapidly increasing. The following figures (the Canadian fiscal year ends on June 30) bearing on that part of the question, speak for themselves :—

|           | Total Canadian<br>Exports. | Exports to Great<br>Britain. |
|-----------|----------------------------|------------------------------|
| 1902..... | \$ 196,019,000             | \$109,348,000                |
| 1901..... | 177,431,000                | 92,857,000                   |
| 1899..... | 138,462,000                | 85,114,000                   |
| 1897..... | 123,959,000                | 69,533,000                   |
| 1895..... | 103,085,000                | 57,903,000                   |
| 1890..... | 85,257,000                 | 41,499,000                   |

“ The exports consist largely of horses, live cattle, meats of all kinds, general farm and dairy produce and fruits. Other considerable items in the trade are the products of the mine, the forest, the fisheries, and the manufactories of the different provinces.

“ Prior to 1896, the imports from Great Britain, of its staple manufactures, were decreasing ; but owing to the influence of the preferential tariff, abundant harvests, and increased immigration, the trade has since been advancing, as shown by the following figures :—

|           | Total Canadian<br>Imports. | Imports from Great<br>Britain. |
|-----------|----------------------------|--------------------------------|
| 1902..... | \$ 202,791,000             | \$ 49,215,000                  |
| 1901..... | 181,237,000                | 43,018,000                     |
| 1899..... | 154,051,000                | 37,060,000                     |
| 1897..... | 111,294,000                | 29,412,000                     |
| 1890..... | 112,765,000                | 43,390,000                     |

“ There is plenty of room for the expansion of Canadian exports to Great Britain, and of British exports to Canada. Canadians believe that, all other things being equal, there is a disposition in the United Kingdom to look favourably on the products of the

Canadian farms, dairies, and orchards—such as wheat, oats, flour, butter, cheese, eggs, bacon, ham and other meats, canned goods of all kinds, and fruits; and also on the other natural products and manufactures to which reference has been made. The trade might be much increased if consumers would inquire for Canadian products among the many kinds that are available.

“My principal object in writing is to state again that the Canadian Government is anxious to facilitate as much as possible communication between British exporters and Canadian importers, and Canadian exporters and British importers; and that correspondence is invited in my department from merchants and importers who are interested. Statistics and other information, relating to the different branches of Canadian trade—both imports and exports—are available; and the various trade journals, daily and weekly papers, official reports, and business directories, are on file in the library and reading room, and may be inspected at any time. I trust the fact of the existence of these facilities may be widely noticed: and am inclined to the opinion that if they are largely utilized it must lead to closer and more extensive commercial relations between the Dominion and the mother country.”

#### PREFERENTIAL TARIFF.

When the blue-book was published containing the report of the Colonial Conference, the discussions that took place on inter-Imperial commercial matters and the resolutions that were passed, attracted much attention. As, however, from some of the comments that were made, it appeared that the working and results of the Preferential Tariff were not thoroughly understood, and that some misapprehension also existed with regard to the nature of the trade exchanges between Canada and the United States, I arranged for the preparation of a memorandum on the subject, which was printed a few weeks ago in the leading daily papers in the United Kingdom. A copy of this memorandum, Appendix A, is attached to this report. (*vide* page 994.)

The usual extracts from the Board of Trade returns, of the trade of the United Kingdom with Canada during the last twelve months, are also enclosed with this report—Appendix B—(*vide* page 997) and will no doubt be of interest in the Dominion.

#### CATTLE IMPORTED FROM CANADA.

It will be seen from the figures that the number of cattle imported from Canada—93,674—shows an increase over the previous year—88,211—although it did not reach the numbers of 1901. It will be noticed that at the same time there was a falling off in the imports from the United States as compared with 1901 and 1900. No doubt the actual exports from Canada were really larger, as most of the Canadian animals shipped from American ports are treated in the Board of Trade returns as imports from the United States; and it must not be forgotten also that there is now a considerable trade between Canada and the United States in cattle, some of which no doubt finds its way to this country in the form of American chilled beef.

#### SHEEP IMPORTED.

There is a falling off in the imports of sheep from Canada, as compared with 1901, although the figures are in excess of those for 1900. This trade is by no means as large as it used to be, owing no doubt to the considerable numbers of sheep and lambs that are shipped from the Dominion to the United States annually.

It is gratifying to know that the animals coming from Canada this year are reported to show a much better quality than in previous years. This fact has been remarked upon by several of my correspondents.

## RESTRICTIONS AGAINST CATTLE.

The agitation for the removal of the restrictions of the free entry of Canadian cattle into the United Kingdom has been kept very much alive during the year, principally in Scotland. An association has been formed for the purpose of introducing a Bill into Parliament to modify the Act of 1896—under which cattle from all countries are now required to be slaughtered at the port of landing, and there have been many meetings in different parts of the country and in London on the subject.

So far as can be ascertained, the Government has no intention of modifying the existing legislation in any way. I have been careful not to identify myself with the agitation, in order to prevent the impression getting abroad that the movement was being engineered under the auspices of the Canadian Government. At the same time, I have supplied any information that was possible, and have pointed out that the removal of the restrictions would be regarded favourably in Canada, and that it has always been a great disappointment to us that the privilege which Canada so long enjoyed was withdrawn under the mistaken assumption that pleuro-pneumonia had existed in Canada; and further that the animals which gave rise to the difficulties were not suffering from that disease. The Board of Agriculture practically admit that a mistake was made, and that the flocks and herds of Canada have always been free from disease; but the admission is not of much practical value now, in view of the fact that the restrictions against Canadian cattle which, in the first place, were temporary, have been made permanent by the Act of 1896.

The proposal which was under discussion for some time, to increase the limit within which cattle must be slaughtered at the port of landing, has attracted some attention, but the impression seems to prevail that it would not be of much practical benefit either to the Canadian shipper or to the importer here—except at times when the market was glutted, and it might be advantageous not to be obliged to force the animals upon a full market.

## SHIPMENT OF PEDIGREE STOCK INCREASING.

It is satisfactory to notice that the shipment of pedigree cattle and sheep to Canada has been increasing in the last few years. It must be beneficial in improving the flocks and herds of the country, and will tend to bring Canadian cattle and sheep up to that high level of quality which must prove of great advantage from every point of view.

## IMPORTATIONS FROM ARGENTINE REPUBLIC.

There have been no importations from the Argentine Republic during the last few years, owing to the prevalence of foot-and-mouth disease in that country. The restrictions have however, now been removed, and importations will probably recommence. It will be observed from the returns that while the animals have not been coming over alive, the fresh meat trade from that country has rapidly developed.

## FOOT-AND-MOUTH DISEASE IN THE UNITED STATES

In the autumn the report that foot-and-mouth disease had appeared in the New England States caused some consternation, both in this country and in Canada. There was a fear that it might be difficult to prevent its introduction across the international boundary. The importation of cattle into the United Kingdom from the New England States was at once prohibited; and in response to the opinion expressed by the Board of Agriculture, the Dominion Government prohibited for a time the conveyance of cattle by the Canadian Pacific Railway across the State of Maine, for shipment at St. John, fearing that Canadian animals so conveyed might be found infected with the disease on their arrival at British ports. Happily, however, the disease in the United States appears to have been promptly and effectually grappled with; and the same remark may be made in regard to the precautions taken by the Minister of Agriculture at Ottawa, to

prevent the possibility of the introduction of the disease into the Dominion. It is satisfactory to state that not a single case of foot-and-mouth disease has been brought to the United Kingdom from Canada since the outbreak in the New England States was reported.

#### CANADIAN CATTLE HEALTHIER.

According to special investigations made in the abattoirs of Glasgow, the Canadian animals imported were much healthier than the British animals slaughtered there—those from Canada showing an exceedingly small percentage of tuberculosis, while the contrary was the case in regard to the native animals.

The number of cattle in the United Kingdom at June 30 last showed a reduction of 100,855 from the moderate numbers recorded a year earlier, while sheep were fewer by 773,258 head than in 1901. This would indicate that the quantity of home-fed meats marketed in 1902 was less than usual. In conjunction with the falling off in the imports of live cattle and sheep, and also in fresh beef, this serves to explain partly the higher prices that prevailed, and the possibility of improved markets for imported meat which are anticipated in the near future.

#### FRESH BEEF.

Although this matter has been attracting much attention in Canada for some years past, it cannot be said—judging from the figures—that the trade has made much progress. The quantity imported from the Dominion appears to have been less in 1902 than it was some years ago. It is worthy of remark that while the trade in live animals has advanced to a limited extent, there has been a great increase in the general imports of beef and mutton and the prices that have prevailed indicate that it is regarded as a more profitable business, especially when the bye-products are taken into consideration. It is computed that the chilled meat imported from the United States in 1902 was equal to 342,000 head of cattle, while the frozen beef from New Zealand, Australia and the River Plate together was equal to about 171,000 head.

#### HORSES.

There was a considerable falling off in the import of horses from the United States, owing, no doubt, to large shipments to South Africa, and there was a reduction also in the imports from Canada, possibly arising from the same cause. A proposal has been under consideration of His Majesty's Government for some time by which a regular supply of remounts for cavalry purposes and of ordinary horses for artillery and draft purposes would be forthcoming every year from the Dominion, but no definite decision upon the matter appears to have yet been arrived at.

The matter of shipments to the British market will not, it is hoped, be overlooked. There is always a demand here for good working horses at a moderate price, and at the same time higher class animals can always be disposed of if they are of the right quality. This subject has been referred to frequently in recent years, and many special reports have been furnished in regard to the supply and demand of animals of the kind. The trade is one which is now conducted through regular channels, and there will be no difficulty in easily disposing of a much larger number of animals than is now sent over.

#### GRAIN, ETC.

It is satisfactory to notice that Canada is now the second largest shipper of wheat to the United Kingdom. The imports last year, however, were only 9,526,713 cwt. from Canada, out of a total of nearly 81,000,000 cwt.; in fact not much more than 10 per cent of the whole.

The grain from Canada is very well spoken of, and much enthusiasm has been created by the bountiful harvests with which Canada has been favoured in the last few

years, by the splendid quality of the grain and the quantity that has been shipped. It is much in favour among millers, and more of it, I am informed, would be welcome.

This applies not only to Great Britain but to the continent, and I quote an extract from an interesting report made recently by the Consul-General at Marseilles on the possible development of a large trade at that port in hard wheat from Canada, in connection with the manufacture of the food products which are so popular along the Mediterranean coast:—

‘I desire most particularly to draw the attention of Canadian farmers to the following notes on the hard wheat export, and to assure all those whom the subject may interest of my readiness to supply them with the fullest information on any point not yet dealt with, which it may be of utility to them to know. I am even prepared to put them in touch with local importers at Marseilles.

‘It will have been seen from the preceding notes how vast is the ground covered by American research; how numerous the undertakings they are prepared to deal with, and if possible to monopolize. In the matter now about to be dealt with we find American pioneers of trade extension investigating at Marseilles the possibilities of further extending their hard wheat trade with Central Europe and the Mediterranean. In the following chapter, that on Bauxites, we shall again find them pursuing diligent inquiries and making sample shipments. There is truly no limit to this most praiseworthy American “pushfulness”.

‘During the month of May of the past year a delegate from the United States Agricultural Department came to Marseilles to investigate the local conditions of the hard wheat trade. American hard wheat suitable for the milling of “semola” (granular flour), so much in demand in the Mediterranean and Southern Europe for the manufacture of macaroni and other Italian pastes, can, I am told, only be grown in the neighbourhood of Minneapolis, the soil elsewhere in the United States not being suitable, hard wheat sown producing soft wheat after one or two sowings. To improve the Minnesota crops in order to enable the American grain to compete with Canadian hard wheat, which is so superior to it in quality, the United States delegate went to Algeria, whence comes most of the hard wheat usually milled here, and purchased at Bône, Algiers and Oran about 100 sacks of the best seed wheat grown.

‘Marseilles is the leading European market for hard wheat. Sales vary from 5 to 20 tons each for Central Europe, and from 1 to 5 tons for the small Mediterranean ports. Though the sales are usually small, they aggregate about 150 tons per day.

‘Last winter the Algerian hard wheat was very far below the average quality. Great difficulty was experienced here in obtaining grain suitable for semolina. Minneapolis, which holds the north Russian semolina trade, made some shipments to Marseilles, via New York, of American hard wheat. This was used here to improve the inferior Algerian grain, and gave satisfaction.

‘Some Ontario and Manitoba hard wheat also came here via New York, and this Canadian grain was found to be altogether superior to the American. This leads me, naturally, to suggest that Canadian millers should inquire into the possibilities of supplying the demand at Marseilles for granular flour (selina).

‘There is, as far as I can see, absolutely no reason why Canada should not endeavour to ship granular flour, milled in Canada from home-grown superior hard wheats, direct to Marseilles, either via the Canadian lakes and the St. Lawrence, or via New York. The problem is solely one of freights and of not breaking bulk. The demand for the granular flour exists. The supply should be unlimited in Canada, owing to the nature of the Canadian soil.

‘The impression seems to exist in Canada that granular flour cannot travel well. That is a mistake. The sole cause of deterioration in transit is due to a defective process of milling. The grain should not be washed when cleaned. That is the sole secret. It is a very simple one, and “known in Minneapolis.”

‘I trust that the Canadian Press will kindly give publicity to the above. I shall be happy to place Canadian millers in touch with local importers. Some means will surely be found of starting a trade that may prove advantageous to our Canadian farmers who seek an outlet for their hard wheat which they can grow with such ease;

and advantageous also to Canadian millers, who in this matter are now in the hands of their enterprising neighbours.

‘I have made some further notes on the hard wheat trade which may be of use to Canadian exporters willing to study the problem I have set before them. They may as well be set down here.

‘The cultivation of hard wheat was formerly of no interest to the farmer, as this wheat which yields so greater a proportion of gluten than does soft wheat, it had less pecuniary value than the latter, and did not always find a favourable market. In these days the reverse is the case, the consumption of hard wheats and of semolinas is increasing daily, while on the other hand we see the principal countries which exported them turning their attention to other produce. For instance, Italy and Spain, which used to produce hard wheat in great quantities, have now taken up vine-growing in its place, thus becoming buyers instead of exporters. Syria also used to produce a great deal of hard wheat, to-day the farmers there also devote their time to vine-growing. Moreover, with the exception of one or two districts, the Syrian wheats have always had a bad reputation. Russia, formerly the greatest exporter of wheat, is a country more than any other affected by the state of the atmosphere, so that one can never count on the wheat harvest until it is reaped. Occasionally, for months at a time no wheat comes to Marseilles from that country. In winter, from November to March, all trade ceases with the Sea of Azoff, the sea being frozen over.

‘Again, Russian wheats do not always arrive at Marseilles in good condition, occasionally they arrive in such a state as to strongly resemble soft wheats, in other words, though the composition of the grain has altered but in a very small degree, the grain no longer gives the same good results.

‘The hard wheats in Africa have diminished greatly in quality. For the last two or three years such a thing as a good hard wheat has really ceased to exist! Semolina and macaroni have been made from the best that could be found.

‘Judging from the excellent specimens of hard wheat received here from Canada during the past year, there is at Marseilles a splendid opening for Canadian hard wheat. The samples shown to me, to which the name of goose wheat has been given here, were for the most part of a distinctly superior quality, and, I am assured, have given full satisfaction to the semolina and macaroni manufacturers who have used them. These wheats arrived here at a moment when there was a scarcity of other hard wheats at Marseilles. They helped to raise the quality of semolina by the rich clear colour of the Canadian grain.

‘The semolinas made from pure Manitoba or Ontario hard wheat are of a fine yellow colour, and very tasty. It is true, they have not the same amount of gluten found in certain Russian wheats; but one can safely say that they are of a superior quality and capable of a good sale if introduced into Europe. The European consumption of semolinas is of 600 to 700 tons a day at the least; there would be an ample market for well chosen Canadian produce.

‘If Canadian millers are desirous of going in for the trade in semolina, I shall be only too glad to give them, on application, and free of all cost, all the necessary information as to plant, and as to the personnel required to start the works.

‘Marseilles might with advantage be selected as the port of the Mediterranean where operations could be begun. If one or two firms cared to go in for the business, small shipments should at first be made, gradually increased until an important opening will have been secured at small risk, or even without any risk of loss, the first shipments serving as samples, any necessary modification being made as required.

‘The charges at Marseilles are low. Goods may be received on payment of 1 fr. per kilo, maximum. This could be considerably reduced in proportion to the amount of goods dealt with. When once on the quay the expenses generally come to 2 fr. 50 c. per ton maximum, including receipt of goods, portorage, carting to warehouse. Warehousing and insurance, maximum, 75 c. per ton per month. Unwarehousing, cartage, commission, and 2 per cent guarantee of payment, would amount to 2 fr. 50 c. per ton,

‘In the case of goods arriving at the moment of immediate reshipment, or sold in advance, with consequently no need of warehousing, there is only a charge of 50 c. or 1

fr. per ton cost of portorage if the goods are unloaded near the rails. If, however, they be discharged some way from the rails the extra charge would be 2 fr. 50 c. per ton maximum.

‘As to the packing, semolinas are generally delivered under double bagging of Hessian jute cloth, a very cheap article, in bales of 100 kilos, gross for net, packing cloth counted as merchandise. But a packing which I can recommend, and which might prove very successful, would consist of a strong cotton cloth covered by a cloth of strong coarse jute, the outer wrapping serving only to preserve the inner one. The cotton cloth should not add too much to the cost of the packing, it should bear no mark or stamp of any kind save the lead on the seam. The buyers would be much interested in this matter of cotton covering, which would serve for household purposes when emptied; any marking or stamping would depreciate their value. The bales could easily be of 1 cwt. without much increasing the cost of packing. Bales of the smaller size would be more convenient for transport and manipulation, and for the better preservation of the merchandise on the voyage. But all these matters of detail could be altered as experience would render necessary.

‘As to semolina mills, all the information available here bears out the facility with which a mill turning out flour from soft wheat only could be transformed into a semolina mill of hard wheat.

‘Taking a mill tritulating 50 tons of wheat per diem, it is estimated that with a maximum expenditure of £4,000 it could be transformed into a semolina mill capable of dealing with from 60 to 65 tons of hard wheat instead of 50 tons of soft. Increased production would soon make up for the outlay. There are in the United Kingdom several first-class firms who have fitted up semolina mills in this district, and whose machines have given full satisfaction.

‘Something could also be done here in feed flours, an article greatly in demand in the neighbouring mountainous regions.

‘At Marseilles there is also a considerable demand for bran and other secondary products of hard and soft wheat. The tonnage sold is almost unlimited, Marseilles being the port that feeds a great many countries demanding that article.’

#### REGISTRATION DUTY ON GRAIN.

The imposition of a registration duty on grain, flour, &c., caused a great deal of discussion in the United Kingdom in the spring of the year. An endeavour was made to work up an agitation upon the subject, and all sorts of evils were prophesied as likely to result from the operation of the new duty. It was felt, however, that the agitation was more political than real, and it never had much effect upon the people. It is very certain that the supplies have not fallen off, and that the prices have not increased, and there does not seem to be any immediate probability of the taxes being removed in the near future.

I endeavoured to induce the Government to exempt the Colonies from the operation of the tax in question. Although unable to obtain the desired result, you will have seen from the correspondence, and the reports of my interviews with various members of the Government, that everything possible was done in the interests of Canada. When exemption proved to be impossible, an endeavour was made to get the incidence of the duties altered, as they were found to be rather against the importer of flour and in favour of the home millers. In this matter I co-operated with the trade to the fullest possible extent. In some minor details the duties were changed subsequently, but the alterations did not affect Canada to any considerable extent.

#### FLOUR.

There is a gratifying increase in the quantity of flour imported from the Dominion, and it now occupies the second place in the returns, after the United States. The business, however, is in comparatively few hands, and I have had many applications during the year from persons in the trade who desire to obtain the agency of some of the Cana-

dian mills. This is evidence in itself of the popularity of the flour, and of the favour with which it is regarded ; and no doubt a much larger business would be possible if the necessary supplies were forthcoming.

#### IMPORTATIONS IN BOND.

Complaint has been made in the course of the year that Canadian flour imported in bond in the United Kingdom could not be re-exported without payment of duty. Representations were made upon the subject to the Colonial Office and arrangements were made which will, it is believed, to some extent, meet the complaints referred to.

#### SUPPLIES FOR IMPERIAL DEPOTS.

In the course of the year a representation was made to me that Canadian flour was not receiving fair treatment in connection with the tenders invited for the supply of flour at the Imperial depots in the West Indies, particularly in Bermuda. The matter was taken up with the Colonial Office and with the War Office, and possibly some good may result in the future.

#### MIXING OF CANADIAN AND AMERICAN WHEAT.

Attention was called during the year to the German customs regulations with regard to the mixing of Canadian with American wheat, requiring all shipments from the United States to show that none of the grain was of Canadian origin. There are no means of getting over the difficulty at present, it is feared, with regard to the interchange of trade between Germany and Canada, until negotiations can be opened with Germany by which Canadian imports may be placed on a better footing than they now enjoy. The disadvantages under which we nominally labour at the present time are, of course, the outcome of the Canadian preferential tariff, and the means that were taken to secure the denunciation of the Belgian and German treaties in 1898.

#### BARLEY.

Canada has not yet assumed the position in regard to shipment of barley to the United Kingdom which we have always hoped to see. The country is suitable for the production of barley of the highest quality for malting purposes, and also for the more ordinary barleys for distilling and feeding purposes. By far the larger proportion of the shipments come from Russia, from the United States, and from the Danubian countries ; and if these parts of the world find the trade profitable, it is not clear why—all other things being equal—Canada should not endeavour to secure a share of it. This important trade, you will observe from the returns, is increasing yearly. The imports last year were of the value of £7,130,000.

#### OATS.

For some reason or another the imports of oats from Canada have fallen off considerably. There is no question about the demand for suitable oats that exists here, or as to the extent of the market, the imports last year having reached a value of over five millions sterling.

#### PEASE.

Practically the same remarks made about barley and oats apply in the case of pease. The trade has fallen off very rapidly in the last few years, probably owing to the operations of the insect pest which has been so frequently referred to. An extract from a letter received from Messrs. Griffin & Culverwell, of Bristol, on the subject of the market for pease, &c., in this country, is worthy of consideration :

'We have been very much disappointed to find that Germany is taking away the trade in split peas from Canada. We know that Canada has had bad crops of peas, but surely there ought to be districts in such a vast extent of land where good crops of peas could be secured. Another point is that the Canadian millers of split peas do not polish them and make them bright looking as is done by Liverpool, Scotch and German millers. There is, we believe, a firm in Edinburgh or Leith that makes special machinery for polishing peas. This process adds an attractive appearance to the article, and makes it much more saleable.

'Holland is nearly the only source we have, out of England, for large blue peas for cooking, and this year they have been able to get from 54s. to 59s. per 50½ lbs., f.o.b. Holland. The Dutch have had the monopoly of this trade for many years. We do not know what peculiar conditions of soil or climate are required, but it seems almost certain that in some parts of Canada similar conditions could be found. The chief points are, good green colour, large size, and good cooking properties. There is also a large demand for a smaller blue pea similar to the kind grown in Wisconsin, sometimes called "Scotch" also for cooking.

'White peas of good size and cooking quality are also saleable, but only to a small extent in comparison with the blue variety.'

It seems to me that some inquiry might usefully be made as to the falling off both in exports of barley, oats and of peas from Canada, with a view to find out the difficulties that are in the way, and to endeavour to remove them and to increase the trade in these commodities.

#### INSPECTION CERTIFICATES FOR GRAIN.

The result of the investigation that was made in regard to the issue of inspection certificates for grain shipped from the Dominion, seems to have been on the whole satisfactory. Some complaints, however, are still reaching me from time to time, and the subject is one that requires to be watched carefully.

#### SUPPLIES FOR SOUTH AFRICA.

During the past year there has been a considerable amount of correspondence with the Department of Agriculture, arising out of the supplies of hay, oats, &c., shipped to South Africa for the War Office under the auspices of that department. With the termination of the war, the shipments came to an end, and although at the request of the Minister, several efforts were made to obtain further contracts, they were not successful, for reasons that will be obvious. The large quantity of Canadian produce sent to South Africa has drawn considerable attention to Canada, as a source of food and other supplies, and I trust that the new line of steamers, which is now plying directly between Canada and the South African ports, will do much to promote the closer connection of those two parts of the Empire.

#### SUPPLIES FOR BOER FARMS.

In connection with the close of the war in South Africa, I have had correspondence with Mr. Chamberlain, with regard to the purchase of cattle and of supplies in Canada, for re-stocking the Boer farms in South Africa. I also spoke to Mr. Chamberlain on the subject before his departure for South Africa, and he promised me that if anything was to be done the claims of Canada would not be overlooked. As the result, some orders have been given for agricultural machinery in Canada for South Africa, and I hope the Dominion may participate in any further orders for supplies of various kinds that may be needed in the future. The matter will continue to have my attention.

#### BUTTER.

The butter imports from Canada show remarkable expansion in the last three years, the quantity received from the Dominion having more than doubled. It still, however,

only represents in value £1,347,345, as compared with £9,302,362 from Denmark, £2,233,122 from France, £2,196,234 from Russia, and £1,973,960 from Holland. It will be seen, therefore, as the total imports of butter were valued at £20,527,934, that there is a very large market for the produce of the Canadian creameries. A much greater quantity could be dealt with than at present through the existing channels, and I believe—all other things being equal as to price and quality—that there is a disposition to favour the butter from the Dominion and the colonies in preference to that from foreign countries.

The Department of Agriculture is fully informed as to the position of the butter trade, and to what is stated on the markets with regard to that from Canada, so that it is not necessary to enter into the matter at any length. If some of the difficulties that have been referred to in the course of the correspondence that has taken place on the subject can be removed or modified, there is no reason why, in the near future, the butter trade of Canada should not expand, and become as important in every way as the Cheese trade.

CHEESE.

The enclosed cutting from the *Times* with regard to the cheese trade in the past year, will no doubt be interesting :—

The strong hold which Canada has secured upon the cheese markets of the United Kingdom is well shown in our next table, from which it appears that in 1902 just over two-thirds of our total imports of cheese were sent from the Dominion. The actual quantity, 1,709,566 cwt., is, we believe, “a record.” Furthermore, the position is well earned by the Canadian cheesemakers as a reward for their persistent efforts to send us a genuine unsophisticated article. The bulk of this trade was once in the hands of the United States, but they lost it through shipping to us “filled” cheese, in which the natural fat of the milk had been withdrawn and replaced by inferior and cheaper fats. The authorities in the United States put an end to this nefarious and suicidal business some years ago, but the fact remains that last year for every pound of cheese we received from the United States, more than four pounds reached us from Canada. Our imports of cheese from Holland appear to be slowly diminishing, whilst from France they are, on the whole, fairly well maintained. Australasia is evidently as uncertain a factor in the cheese industry as in the butter trade. As a matter of fact, out of the 52,072 cwt. of cheese which arrived at our ports from Australasia last year, 52,065 cwt. came from New Zealand and only 7 cwt. from Australia. For imported cheese in 1902 we paid a total sum of £6,421,420, of which £4,301,859 went to Canada, £962,112 to the United States, £668,303 to Holland, £131,516 to New Zealand, £113,611 to France, £18 to Australia, and £235,001 to “Other Countries” :—

ANNUAL IMPORTS OF CHEESE INTO THE UNITED KINGDOM, 1899 TO 1902.

| From            | 1899.     | 1900.     | 1901.     | 1902.     | Per cent. | Per cent. | Per cent. | Per cent. |

| France. ....    | 34,307    | 35,110    | 26,833    | 36,801    | 1·4       | 1·3       | 1·0       | 1·4       |
| Other Countries | 60,992    | 69,928    | 76,997    | 73,448    | 2·6       | 2·6       | 2·9       | 2·9       |
| Total ....      | 2,384,069 | 2,705,878 | 2,586,837 | 2,546,384 | 100·0     | 100·0     | 100·0     | 100·0     |

All my correspondents, without almost any exception, state that the cheese sent over last year from Canada was better than that shipped in any previous years. This

is attributed by many of them to the cool season which prevailed, which was favourable both for the preparation and for the carriage of the article.

Some of the communications that have reached me refer to the boxes still not being quite strong enough for the cheeses, and to bad handling on shipment and on unloading, but complaints of this nature are few and far between. One suggestion has been made to me, which is worthy of consideration, viz: that the weights should be stencilled on the boxes and not pencilled, as the latter are liable to get rubbed off.

#### BACON.

The statistics do not show much expansion in the imports of bacon from Canada. Whether there has been a shrinkage in the trade or not, cannot be said at present, as the Canadian figures are not available to enable a comparison to be made with British figures to the end of the year. The trade, however, is assuming considerable proportions, and as both Canadian bacon and Canadian hams are highly spoken of and much appreciated, there is no reason why the business should not develop to an unlimited extent, if the quality is maintained and if the article can be purchased at a price to compete with that from other countries.

#### POULTRY.

Canada does not figure in detail, in the Board of Trade returns, in regard to the imports of poultry. The inquiries made into the matter indicate much surprise that more poultry—that is turkeys, fowls and ducks—are not shipped to this country. It is true that the reports of the Christmas trade in Liverpool were not very satisfactory, and the results cannot have pleased the shippers. In London at that time there was little if any, Canadian poultry for sale at all. My correspondents all seem to think that there will be a good market this spring, both for turkeys, fowls and ducks, but they urge careful preparation, careful packing, and careful grading.

The following circular issued by a leading firm in the London markets may be interesting:—

#### ADVICE CONCERNING POULTRY CONSIGNMENTS.

“Much of the dead poultry consigned to the London markets is sent without regard to a very simple rule, namely:—From the salesman's point of view it is absolutely necessary all poultry should be fasted (i. e. kept without food or water eighteen hours before killing); the necks should be broken close to the head, which is undoubtedly the most humane way of dealing with the birds, for the spinal cord is thus severed, and all life immediately ceases (the apparent struggle afterwards noticeable being due to muscular reaction). The fowls should be plucked, care being taken not to “bark” the skin; they must then be tied loosely at the hocks. Both fowls and ducks should be pressed in the shaping board, remaining there from four to six hours until they have thoroughly cooled. Finally, they should be packed in baskets, or hampers, having some straw or paper between each layer. With some little modification this principle applies also to geese and turkeys. Market value will be considerably enhanced by attention to proper killing, preparation, and careful packing.

#### HAY.

Canadian hay seems to have obtained a good hold on the markets of this country, and I am assured it is so popular that it often commands a higher price than home-grown hay. The quality of the shipments in 1902 was not perhaps quite up to the mark of 1901; and, on the other hand, there was a very large crop in the United Kingdom last year, which tended to keep down the prices and to diminish the demand for the imported article. So far as I can ascertain Canadian hay is regarded as a well-

established trade, and it is likely to continue to be imported in large quantities—so long as prices are suitable and the regular supplies are maintained.

Hay should always be carefully selected before being baled, and the principal thing to be borne in mind as regards hay and other commodities shipped to this country is that it should obtain a reputation for itself, that its reputation should be maintained, and that the supplies should be regular. These considerations would enable the trade to be done with mutual satisfaction to the shipper and to the importer.

#### APPLES.

While it is generally stated that the packing of Canadian apples has been better during the last year, and that the grading has been more satisfactory, the quality of the apples shipped has hardly been quite up to the mark. The principal objection has been the spotty and scabby nature of the apples, largely due to parasites. This matter has been fully reported to the Minister of Agriculture by his agents in this country, and it is not necessary within the scope of this report, to go into the matter in detail. Some of my correspondents have complained to me also that the apples received by them during the late autumn and winter have arrived in a frosted condition. This is attributed to delays at the port of shipment and to proper arrangements not being made there for the care of the apples between the time of their being unloaded from the railway and their shipment.

The barrels are reported to be of good quality, with some exceptions, but instances have been reported where the barrels have been defective and where in consequence the prices obtained for the fruit have been lower than they otherwise should be.

The spots and scabs on the apples are believed to arise largely from heating and sweating, and it has been suggested whether this could be prevented in any way by ventilating the barrels, especially now that they are conveyed in compartments which are ventilated and kept cool to a greater extent than was formerly the case.

We still hear a good deal about too many varieties being forwarded in small shipments. This tends to a reduction in price. Much better results would be obtained if the shipments could be sorted in Canada and larger consignments of the same quality and grading of fruit sent over. Whether this is practicable or not I cannot say, but it seems to be worthy of inquiry. Possibly it has already been investigated, as the matter has been mentioned on so many occasions.

#### CHOICE FRUITS.

The opinion is still expressed that choice fruits of the different varieties would pay much better if sent over in small boxes. Many families are unable to purchase a barrel, or at any rate to consume its contents before the apples begin to deteriorate. This would not apply to small boxes of choice fruits, and I have had many suggestions that fruit packed in this way would command a good sale and bring higher prices than when shipped in larger quantities in barrels.

#### EARLY FRUITS.

Another matter which has been brought forcibly to my notice is the mistake of shipping too much soft and early fruit to this market at a time when it is glutted with home and foreign supplies. Very often the results are disappointing to the shippers and tend to influence trade for the rest of the year. If the inferior and softer fruit, which will not carry well, could be utilized at home in the manufacture of dried, evaporated and canned articles, I believe it would be of advantage to the industry generally.

#### EGGS.

The export of eggs is not developing as the trade at one time promised. The total value of the eggs imported last year was about £6,299,000, of which Canada contributed

only £209,000. Canadian eggs are very well spoken of, but it does not appear that the trade is at all well organized. There are numbers of commission agents and others willing to enter into the business, and I shall be happy to furnish any of those engaged in the industry in Canada with the names of suitable firms with whom they can communicate.

## CANNED EGGS.

The following is an extract from a letter I have received, relating to canned eggs, which may be of interest to some of the readers of this report :—

‘We are very anxious to obtain a shipper who will ship us canned eggs. We believe there is a great future before eggs packed in this condition. We deal largely with bakers and confectioners all over the United Kingdom, and we have repeatedly had inquiry for eggs packed like this. They are imported here from Russia, Germany and Denmark in large packages with some preservative in them, we do not know what it is. Of course, the packages would require to be hermetically sealed, with the air extracted from them, but the eggs would not require to be heated in any way, as this would spoil their properties. We fancy if they were shipped with sugar, to a small extent, it might form an adequate preservative; but really, as we are not experts in that, we cannot offer any opinion. It is for the Canadian experts to find out the suitable and necessary preservative. Chipped eggs in some parts of Canada can be bought very cheaply, and we fancy a great deal of money could be saved if they were immediately broken and canned. We would strongly advise you to write to your government on this subject, and get this matter looked into. These eggs are sold here sometimes with the yolk and sometimes without the yolk, and the packages should run 7 lbs., 14 lbs. and 28 lbs.’

## LARD.

The following is an extract from a letter from Messrs. Bancroft & Co., of Liverpool, upon this trade :—

‘The only branch of Canadian trade which interests us is raw lard, and we are pleased that we have been able to do a small amount of business in it during the last month. We are quite sure if the Canadian packers will maintain their quality and have regular shipments of it to this market, they would find a steadily increasing trade, provided that they will compete in price with the United States western lard. Certainly, we shall be happy to give them the preference any time when the quality is right.’

## LARD OIL.

Messrs. Griffen & Culverwell have also written me as follows with regard to lard oil :—

‘We think there should be a trade done in lard oil now that the packing of hogs and making of lard is growing into large proportions. If you know of any firms who want an outlet for lard oil please let us know.’

## CANNED GOODS.

The following is a useful letter from Joseph Travers & Sons, Ltd., of Cannon Street, London, with regard to the importation of canned goods into this country :—

‘The quality of Canadian preparations in canned fruit have been, in most instances, equal to the States fruit, but the want of continuity in supplies has led to loss of interest on the part of the distributor, and every fresh shipment has had to open a new market. This to a great extent will be avoided with “dried” fruit, which is sold almost entirely on its own merits, irrespective of brand or country of production.

‘The canned meat trade has for various reasons improved considerably, and after making every allowance for the war demand, it must be admitted that this form of preserved food is growing in favour. A few years ago, when new methods of carrying chilled and frozen fresh meat were being introduced, the decline and ultimate extinction

of this article was freely prophesied, but the quality combined with the convenience of being ready for immediate use has quietly re-established the article and given it an independent existence. As far as beef and mutton are concerned, it is the only method of distribution that admits of self-advertisement. Take, for instance, the 6-lb. taper tins of Chicago compressed corned beef—the flat surface of the four sides of the tin is much better adapted for showy labels, and in fact is invariably chosen for window dressing or counter decoration, which at once obtains for it a gratuitous and important advertisement. The large Chicago firms have always recognized the importance of this branch, and their financial position to-day is sufficient evidence of their business acumen in this direction. The Queensland meat companies which commenced on the American system a few years ago have now surpassed their rivals in quality, are able to obtain a better price, and can readily sell all their machinery can produce. The prices now ruling for compressed corned beef in taper tins is from 5s. to 5s. 6d. per dozen for 1-lb. tins, 9s. to 9s. 6d. per dozen for 2-lb. tins and 29s. 6d. to 32s. per dozen for 6-lb. tins, according to quality and brand. There is also a large trade done in boiled beef in 6-lb. round tins, but the package is not growing in favour.

‘We would take this opportunity of pointing out what, in our opinion, is a very important question in the salmon packing industry. The quality of the fish packed in the Dominion was, up to the commencement of the combination of packers, in every way superior to the States salmon, and the fact that a wide difference in quality existed in Canadian packs themselves proved the principle that difference was due to the care and efficiency of the packer. The introduction of an all round price, which is a part of the system of selling adopted by the combination, has completely neutralized individual effort in this direction, and the unfortunate result is that the pack as a whole has considerably declined in quality. Should this continue, the high opinion with which the pack has been regarded both by dealer and consumer will be considerably reduced, and the aggregate value of the pack will be less than it was before the combination of packers existed.

‘One of the most important features is the increasing popularity of Dried Fruits, such articles as plums and prunes. The quantity imported during last year from the United States would probably turn out to be double any previous year, and the dried variety of apricots, pears and peaches have also had an impetus showing that the people here are beginning to get over their prejudices and are learning to cook the fruit in a proper way. In this direction we may say that Oregon fruit, which is machine evaporated, has been very much appreciated, and as the climate probably compares favourably with that of some parts of the Dominion, it is a development worth watching.’

#### FRUIT PULP AND TOMATOES.

The following extracts from a letter from another of my correspondents, on the subject of Fruit Pulp and Tomatoes, is worthy of re-production:—

*Fruit Pulp* for which there is, at times, a large business to be done in this country, should be packed in tins made of best gold lacquered i.e. steel coke plates, such as are used by French packers. Many jam makers in this country refuse to buy any Fruit Pulp which is not preserved in these lacquered cans. We sent out, last autumn, to one packer in Canada, a sample shipment of these gold lacquered plates. They are much more expensive than the tin plate which the Canadian packers generally use, but we believe the increased price packers would get for their fruit, and the reduction of blown and burst tins, would more than cover the extra expense.

‘*Tomatoes.* Owing to various causes, Italian tomatoes have taken the place of American almost entirely in this country, and as there appears very little prospect of America being able to ship to England any large quantity of tomatoes in the future, there is a good prospect for Canadian packers, but, in order to get hold of the trade, they should obtain samples of Italian tomatoes, such as are shipped to England, and adopt the same can as the Italian packers use, slightly larger than the American, and better made, without solder. The cases used by the Italians for Tomatoes are much

better made and more suitable for transit than the cases that the Canadians usually send.'

## CAVIARE.

Quite a number of persons engaged in the distribution and sale of this product have approached me in their desire to get into direct touch with likely exporters of Sturgeon's roe from which it is prepared. From time to time inquiry has been made into this matter, but we have not succeeded in meeting the wishes of my correspondents to any extent. Your department has been asked to assist me so far as may be possible, and we may hear of some new sources of supply in the near future.

## LUMBER AND LUMBER PRODUCTS.

The conditions of the lumber trade in this country are well known. All the leading Canadian houses are represented in London, and the business is largely in their hands. During the year there were several communications from smaller houses in the trade who have not agents on this side, and have been the means of placing them in communication with firms with which they might be able to arrange business. I was able to bring to the notice of the London houses engaged in the Canadian timber trade, the requirements of the railways in the Transvaal and Orange River Colonies, in the way of sleepers and general lumber. Whether any tenders were sent in for Canadian supplies or not is not known to me, but at any rate the necessary information was placed in the possession of those who were interested.

## BLOCKS AND WOOD PAVING.

It is a matter of regret to me that Canada does not take a larger share in the supply of the blocks for wood paving, that are so extensively used in London and other British cities. The best has been done to bring the importance of the matter to the notice of those concerned, but for some reason or another comparatively little interest has been taken in the matter in Canadian lumber circles.

## BASSWOOD PANELS.

My attention was drawn some time to the demand that exists for basswood panels 48" x 18" x  $\frac{7}{8}$ " for piano key makers both here and on the continent. A good many of these already come from Canada and there is a strong preference for Canadian wood. As it takes six feet of lumber, costing on an average, 2 cents per foot at the mill, to make a 2s. panel, it will be seen there is an ample margin. The greatest care is, however, requisite in the selection of the wood.

## CARRIAGES.

In the early part of the year I wrote you in reference to the possibility of an increased export business being done in Canadian carriages, and submitted to you a proposal from a well-known firm in London who are willing to aid makers of carriages in the Dominion to put their goods on this market. The same people offered to show any specimen carriages that might be sent them for the purpose, at an important show. The exhibits of Canadian made carriages at the Glasgow Exhibition and elsewhere attracted a good deal of attention, and some good sales were effected. Their lightness is admired, as well as their smart appearance, and the business is capable of extension.

## WOOD PULP AND PAPER.

The wood pulp importations from Canada seem to be increasing. The feeling prevails that an effort should be made by Canada to prevent the exportation of the raw material, and to encourage the industry in the Dominion.

This gives expression to the feeling that generally obtains, that the matter is largely in the hands of Canada, as the possibility of competition from other sources is decreasing year by year.

#### MECHANICAL WOOD PULP.

Some surprise is expressed that the development in Canada so far should have been in the direction of mechanical wood pulp rather than in sulphite. The trade in the latter in the United Kingdom is much larger than in the former, the quantities consumed being about the same, viz., 250,000 tons, but while mechanical pulp is shipped containing 50 per cent of water, chemical pulp is shipped air dry, consequently the actual amount of fibre in sulphite is almost double that of mechanical. The following is an extract from a letter received on the subject :—

‘We must strongly urge for future developments in Canada properly organized sulphite mills, and there can be no doubt that the future of sulphite making lies in Canada. Our reasons for this statement are the following :

‘We have seen that Canadian mechanical pulp mills can compete successfully with Scandinavia.

‘The only advantage they have over the Scandinavians is a modern plant and cheap wood, and the disadvantages under which they labour, are the extra freight rates.

‘Now the wood necessary to make a wet ton of mechanical wood pulp in Scandinavia costs on the average 11s. per ton ; and in the best situated mechanical mills in Canada is said to cost 6s. a ton. A Canadian mechanical wood pulp maker therefore starts out with an advantage of 5s. per ton wet ; against this he has an extra freight to pay of 5s. to 6s. a ton at an optimistic estimate, and therefore has no present great advantage, except that of modern plants over his Scandinavian competitors.

‘But reversing the position to chemical pulp making, the wood necessary to make a ton of chemical pulp costs in Scandinavia 60s., because the bulk of the wood boiled is boiled away ; reckoning the wood costs \$3 a cord at the mill, it would cost the Canadian only 30s. for his wood to make a ton of pulp, and leaves him an advantage of 30s. per ton. Against this he would have an extra freight to pay on dry pulp of 7s. 6d., and he starts out making pulp with a certainty that he can get his raw material so cheaply that he can manufacture 20s. to 22s. per ton less than the Scandinavians.

‘The answer to this argument is, of course, why don’t the existing mills do it, and the reply to that again must be that whereas any intelligent man can become a fairly expert pulp grinder in six months, in sulphite making great experience is required, and many a man who has been a sulphite maker all his life cannot make sulphite when he dies. The sulphite maker, like the paper maker, is born, and the workmen who can be obtained in Canada are not sufficiently experienced, and do not take the care requisite in the manufacture of a good sulphite pulp.

All these are difficulties which can be overcome, and Canada is to-day making no fair share of the sulphite of the world, and it is in this direction that it will be a pleasure for the writer to convince Your Lordship that the future development of Canada in the pulp trade is possible.’

#### MANUFACTURE OF PAPER.

An extract from another letter I have received from a well-known paper agent in London, on the subject of the manufacture of Canadian paper and its export to this country, will be interesting :—

‘\* \* \* As regards pulp and paper—particularly the latter, in which I am more interested—there is very little to report excepting the scarcity of Canadian paper on this market during the last twelve months. Prices have been very low here, and I believe trade has been exceptionally brisk in Canada and consequently makers were largely kept busy on the home trade. This, however, merely shows how small the paper-making industry in Canada is compared with what it might be when a little extra demand on the home market practically monopolizes the output of the Canadian mills.

‘What newspaper has been received here (“news” is practically the only grade as yet imported from Canada) has been of good quality and generally liked.

‘It is astonishing that developments do not take place more quickly and that a big effort is not made to capture this market. I have, during the last year, had opportunities of comparing the possibilities of Canada in the pulp and paper business with those of Scandinavia, and have been forced to the conclusion that Canada has little or nothing to fear in the matter of quality at any rate from Scandinavia. The wood there is much more difficult to get at, and is, as a rule, of poorer quality and only to be had from trees of small growth. It is much more knotty and generally a great deal more costly to handle.

‘So far as Norway is concerned it has practically no forests left, and I should say that in Scandinavia generally the growth is much slower, and, as a rule, the cordage per acre is very small as compared with that of Canadian forests in the eastern provinces. It can be safely said, I think, that within ten years’ time, unless conditions change in an extraordinary manner, Norway will be exhausted and Sweden nearly so, as far as pulpwood is concerned.

‘I would like to suggest, that in order to attract pulp and paper manufacturers to Canada, the leases of limits should be put upon a permanent basis. The present arrangements of having to renew leases under what is practically a competitive system does not attract capital, and it is absolutely essential to attract the best class of makers to give a permanent security in this way.’

#### PULP.

At the same it is right that I should quote a communication from another correspondent, who deals largely in pulp, and consequently takes a different view of the matter :—

‘We would like to add a word in regard to paper-making. There is much talk of paper-making in Canada, but the difficulties that attend the manufacture of paper in an out of the way place are not understood, or they would never be contemplated for a moment. The damage in transitu alone to paper in reels amounts to something like 15 per cent. Besides this, all that can be urged against the manufacture of sulphite in Canada in the way of lack of experience, can likewise be urged in paper-making, only doubly and trebly so, and it would be possible to show clear figures and absolute proofs that it would be better for a mill to locate its mechanical pulp mill where there is water power, its sulphite mill where there is wood, and the paper mill to convert it into paper, where its market is. Thus, in ventures of this sort we should strongly urge (and could give you good proofs of the argument) anybody desiring to go into the paper trade should make his pulp in Canada and his paper in England.’

#### SOUTH AFRICAN TRADE.

A large business is likely in importations in South Africa in the next few years. This applies to agricultural implements, to manufactures of all kinds, and to food products; and endeavours are being made to induce the Imperial Government to allow Canada to participate in any contracts that may be given out officially.

#### APPOINT AGENTS IN SOUTH AFRICA.

I would strongly advise Canadian houses, however, either to arrange for representation in South Africa individually, or that jointly a number of firms in different branches of business should combine for the purpose of having a suitable agent. In that way only will Canada have the opportunity of sharing in the large trade that is likely to be done in South Africa within the next few years.

I am not certain that this plan might not with advantage be adopted in the United Kingdom, as while the government and government officials can do a good deal in bringing importers and exporters together and in educational work, the actual business must be done by those who are engaged in the trade.

## IMPERIAL INSTITUTE.

As already mentioned, in the course of the year the arrangements for the transfer of the Imperial Institute to the Board of Trade have been completed, and the new order of things commenced on January 1. It is proposed to retain the interesting collections, to improve them, to keep them up-to-date, and to renew them from time to time, so that they will give a better idea of the resources and capabilities of the various provinces than at present. Offices have also been opened in the city, in which the same class of work will be carried on as at South Kensington. I hope and believe that under the new organization greater benefits will accrue to Canada than in the past, in connection with the encouragement of emigration and the development of trade. The wish has been expressed that the colonies may continue to make their appropriations towards the expenses of carrying on the work in the future, as in the past, and so far as Canada is concerned the hope is expressed that this will be the case.

## FAST ATLANTIC SERVICE.

The discussion that has been taking place during the year, respecting the Fast Atlantic Service, has lead to much correspondence and many personal interviews, largely relating to the claims of various ports in the United Kingdom as ports of call, or as terminal ports for the proposed service. Deputations or representations have been received from the following places: Liverpool, Plymouth, Bristol, Southampton, Milford Haven, Cardiff, Swansea, Newport, Sligo, Blacksod Bay, Lough Swilly, Galway, &c. In each case I have forwarded to the government, for consideration the communications that have reached me from various places.

## INCOME TAX ON PROFITS.

Further correspondence has taken place with regard to the charging of income tax on the profits of manufacturers in Canada, on goods shipped by them to their agents, for sale in the United Kingdom. It is claimed that the charge becomes a discriminating duty against shipments carried out in the manner already mentioned. Wholesale houses buying direct from merchants and manufacturers in Canada are free from any such charge; and it is believed also that while one or two Canadian houses have been singled out for the purpose, many of their competitors in other countries have not been pressed in the matter. While the inland revenue authorities admitted, to a certain extent that there was a sense of inequality in the tax, they fell back on the Act of Parliament, under which they were acting; and when pressed upon the matter it was stated that they were not willing to introduce legislation which would place all the shippers on practically the same footing. Since our correspondence there has been a greater activity on the part of His Majesty's Government in their endeavour to collect the tax from the agents of foreign shippers. The opinion prevails that these efforts will be unpopular, that the amount of revenue raised will be comparatively small, and that in the near future it may be possible to bring sufficient pressure to bear upon the authorities to induce them to reconsider their action. In my judgment the tax is one that cannot be defended from any point of view, but in any case it does seem inequitable to charge the tax on shipments through agents of the shipping houses, while shipments to wholesale firms in the United Kingdom are free from any charge of the kind.

## ATLANTIC BILLS OF LADING (LONDON CLAUSE.)

I have been in communication with your department with regard to what is known as the London clause in the Atlantic Bills of Lading. This clause applies to London only, and provides for a charge, in addition to freight, &c., for dealing with the traffic when landed in the London docks, a charge which has to be paid by the shipper, and is in effect a practical increase in the freight. The charge applies only to shipments from American and from Canadian ports. Our competitors on the continent are not burdened with a similar tax, which operates therefore to the disadvantage of transatlantic shipments. The steamship companies which have combined for the purpose of imposing the

London clause do not seem prepared to withdraw it, and claim that a similar charge is practically made in other parts of the United Kingdom, but is included under another name. I reported fully to you, in order that the matter might be considered with a view to ascertain whether it was possible to take any steps to relieve Canadian trade from the discriminating influence of the charges in question.

## CODFISH—PORTUGAL.

Learning from the newspapers that a convention was under negotiation between Portugal and Newfoundland, by which cod from the latter country would be admitted at a lower rate of duty than was imposed on similar imports from Canada, the matter was brought to your notice. As the result, the Colonial Office was approached with a view to a similar privilege being granted to Canada. In reply, it was stated that Newfoundland had agreed to admit port wine from Portugal at a considerable reduction of duty in return for the concession granted to them; and inquiry was made whether it would be possible to offer any tariff reduction to Portugal in exchange for a lower rate of duty on Canadian cod. The result of my interview was reported to you.

## DIRECT SHIPMENTS FROM ITALY.

At the request of a Genoa shipping house, I brought to your notice the date of sailing of a steamer they had chartered, in order that Canadian importers of Italian produce might be enabled to enter into communication with them with the view of direct shipments being arranged.

## SILICATE COTTON.

The following communication was made to me respecting the above-named article, but I have been unable to find that it is manufactured in Canada at all, notwithstanding that inquiry was instituted through your department and other quarters:—

‘It has been brought to our notice lately that silicate cotton is manufactured in the Dominion, and occasionally orders are placed by English merchants for large quantities. We do not manufacture this article ourselves, though we deal largely in it, and in the circumstances, if you could give us the names of any parties to whom we might apply, we believe we should be able to do a considerable business with them and to our mutual advantage.’

## EQUIPMENT OF THE HIGH COMMISSIONER'S OFFICE.

There are many other matters relating to the expansion of Canadian trade, respecting which I have been in communication with your Department and that of the Minister of Agriculture, but perhaps they are hardly of sufficient importance to be referred to in this Report, especially in view of the length to which it has already reached. I will only state, in conclusion, that my office is well equipped for giving the fullest possible information about Canadian trade and the possibilities of its development. All the official statistics come to us regularly; the leading trade and other newspapers are on file and are carefully scanned by my staff, so that their knowledge of such matters may be kept up to date. The directories of the various cities, and the business directories, are also open for inspection; and we have accumulated a list of individuals and firms in the different branches of commerce, both in Canada and in this country, which is of the utmost value in dealing with our large correspondence on such matters. The success which has attended the efforts of the department for many years past, in connection with commercial matters, is shown, not only in the large correspondence and in the considerable number of callers making use of the office on such matters, but in the increase in the export trade of Canada to the Mother Country, with which I venture to believe the efforts of the department have had not a little to do.

I am, sir,

Your obedient servant,

STRATHCONA,

*High Commissioner.*

APPENDIX A.

PREFERENTIAL TRADE WITH CANADA.

1. While some general interest has been taken in the United Kingdom in the Canadian preferential tariff, very little seems to be known as to its effect upon British trade with the Dominion. Indeed some erroneous impressions appear to prevail on the subject, which could hardly exist were the actual facts known, as explained in the memoranda presented by the Canadian ministers at the colonial conference and published in the official blue book.

2. The following table gives the exports of the United Kingdom to Canada between 1887 and 1897, prior to the adoption of the preference, and shows that the trade steadily declined in that period:

| Year.     | Dutiable.  | Duty Free. | Total.     |
|-----------|------------|------------|------------|
|           | \$         | \$         | \$         |
| 1887..... | 35,766,273 | 9,195,960  | 44,962,233 |
| 1890..... | 33,267,721 | 10,122,520 | 43,390,241 |
| 1893..... | 31,869,267 | 11,279,146 | 43,148,413 |
| 1897..... | 20,217,422 | 9,194,766  | 29,412,188 |

3. The Reciprocal Tariff, as it was at first described, came into operation on April 27, 1897—that is, the last two months of the fiscal year ending June 30, 1897. It was 12½ per cent lower than the general tariff. The preferential tariff of 25 per cent in favour of British goods was in force from August 1, 1898, until July 1, 1900, when the preference was increased to 33½ per cent. The following table of the exports of the United Kingdom to Canada since 1897 indicates a steady and substantial expansion in the trade :—

| Year.     | Dutiable.  | Duty Free. | Total.     |
|-----------|------------|------------|------------|
|           | \$         | \$         | \$         |
| 1897..... | 20,217,422 | 9,194,766  | 29,412,188 |
| 1898..... | 22,556,479 | 9,944,438  | 32,500,917 |
| 1899..... | 27,521,508 | 9,538,615  | 37,060,123 |
| 1900..... | 31,561,756 | 13,227,974 | 44,789,730 |
| 1901..... | 31,701,654 | 11,316,510 | 43,018,164 |
| 1902..... | 35,062,564 | 14,143,498 | 49,206,062 |

4. A small portion of the increase in dutiable goods relates to articles which do not come under the preferential tariff (wines, malt and spirituous liquors, tobacco, &c.), but the figures seem to prove beyond question that the preferential tariff arrested the decrease in British exports to Canada, which was apparent for some years up to 1897, and that it has also led to a continuous increase from that year up to the present time.

5. At the same time, however, these results have not attracted anything like the attention that has been directed to the expansion of the imports into Canada from the United States, dutiable and duty free, in the same period (1897–1902) from \$61,649,000 to \$120,814,000. Any general comparison of the Canadian imports from the United States and Great Britain is calculated to give rise to misleading conclusions on the part of those not acquainted with the nature of the trade ; but an analysis of the statistics for 1901, taken from the Statistical Year Book of Canada, will perhaps be instructive, as bearing upon this part of the question. The totals are as follows :—

|                    |               |               |                |
|--------------------|---------------|---------------|----------------|
|                    | Dutiable.     | Free.         | Total.         |
| United States..... | \$ 53,600,278 | \$ 56,884,730 | \$ 110,485,008 |
| Great Britain..... | 31,701,654    | 11,316,510    | 43,018,164     |

6. In the first place there are the dutiable exports of the United States to Canada, consisting of articles which the United Kingdom does not export to any extent, or in which she could not very well compete owing to considerations of freight and other reasons with a country contiguous to the Dominion like the United States, such as the following:—Cattle and horses, books, periodicals and other printed matter, bread-stuffs, canes, railway carriages, wagons, drays, &c., cash registers, coal and coal dust, coffee, eggs, express parcels, fish, fish oil, &c., fruits and nuts, gunpowder and other explosives, hay, hops, agricultural implements, malt, mineral and vegetable oils (excluding linseed), marble and manufactures, condensed milk, mineral substances, post office parcels, provisions, ships and vessels and repairs, slate and manufactures, spirits of turpentine, vegetables, wood and manufactures of wood, and sundry other articles in the same category. Of such merchandise the United Kingdom sent to Canada only \$1,343,700, as compared with \$20,480,500 from the United States.

7. Then there are other articles, subject to duty, which the United States exported in larger quantities to Canada than the United Kingdom. For instance, take the following:—Antiseptic dressings, baking powder, bicycles and tricycles, braces, &c., brass and manufactures, bricks and tiles, brushes, buttons, candles, cement, clocks, cocoa nuts, &c., copper and manufactures, cordage, &c., corsets, drugs dyes and chemicals, electric material and apparatus, fertilizers, furniture, picture and other frames, glass, gold and silver manufactures, gutta percha, India rubber and manufactures, inks, iron and steel and manufactures, jewellery, lead and manufactures, leather dressing, &c., leather and manufactures metal and manufactures, musical instruments, optical instruments, paints and colours, paper and manufactures, pencils, penholders, &c., photographic plates, pocket books, printing presses and machines, seeds and roots, soaps, starch, &c., stone and manufactures, sugar of all kinds, tin and manufactures, trunks, twines, varnish, watches, webbing, &c. Great Britain only sent such goods to the value of \$7,575,700, as compared with \$29,065,400 exported by the United States. The principal items from the latter country were: drugs, &c., \$1,163,600; electrical material, \$870,600; glass, \$538,600; iron and steel manufactures, \$13,845,500; leather manufactures, \$1,450,800; paper and manufactures, \$1,320,800; and sugar of all kinds, \$989,500. The total imports of these last-named articles from the United States being \$20,179,800, having increased from \$10,718,800 in 1897, notwithstanding the advantages the British shipper has been given under the preferential tariff.

8. In some other manufactures imports from the United Kingdom still have the lead, although competition, on the part of the United States and other countries, is becoming keener. Take, for example, boot and other laces, combs, carpets, cottons, curtains, earthenware and china, elastic, &c., fancy goods, flax and manufactures, furs and manufactures, gloves and mitts, hats, caps and bonnets, jellies and jams, linseed oil, mats and rugs, mustard cake, oil cloth, pickles, sauces, &c., silk and manufactures, spices, spirits and wines, table cloths, &c., tobacco pipes, umbrellas, woollens, &c.—the imports of these articles into Canada from Great Britain were \$22,782,100 as against \$4,054,100 from the United States. In 1897 the figures were \$14,661,000 and \$2,765,000 respectively.

9. These figures account for the bulk of the dutiable imports from the two countries. The average rate of duty in 1901 upon all dutiable imports from the United States was 24·83 per cent. The average rate on goods subject to the preferential tariff from Great Britain was 19·40 per cent. In 1902 it appears to have been somewhat lower.

10. The following are the average rates of duty paid on importations in 1901, under the preferential tariff, on the principal lines imported from Great Britain:—Cement 20·7, cottons 20·4, drugs and chemicals 15·1, earthenware 20·0, fancy goods 22·2, flax and jute 17·9, fur and manufactures 11·9, glass 17·1, gold and silver manufactures 20·0, gutta percha manufactures 22·1, hats and caps 20·0, iron and steel 11·6, paints 7·6, paper and manufactures 18·9, silks 20·9, woollens 23·0. The average tariff on dutiable woollens prior to 1897 was 32 per cent and on cottons 29 per cent.

11. That the ordinary tariff, which is one-third higher than the preferential rates, does not discourage importation is shown by the fact that the dutiable imports from countries not entitled to the preference increased from \$44,888,000 to \$72,558,000

between 1897 and 1901. If any doubt exists in the United Kingdom as to the substantial nature of the preference granted in favour of the British goods, certainly none prevails in the United States, where the manufacturers have found it necessary to reduce their prices to Canada to offset the preference given to British imports.

12. So much for the dutiable imports. In 1901, as already mentioned, the figures of the duty free imports from the United States and Great Britain were \$56,884,730 and \$11,316,510 respectively. The bulk consists of raw materials for the manufacturing industries and necessities for the agricultural, mining, fishing and other industries, which Great Britain does not export to any extent or in the trade in which she could hardly hope to compete with the United States. Take for instance the following goods:—Anthracite coal, asphalt, coke, ores, logs and lumber, furs, undressed, hides, grease for soap stock, raw silk, broom corn, green fruit, unmanufactured tobacco, Indian corn, raw cotton, gums of all kinds, rubber, settlers' effects, binder twine material, coin and bullion, &c. The imports of these articles from the United Kingdom were valued at \$2,536,300, as against \$40,652,800 from the United States. In 1897 the figures were \$716,300 and \$24,509,900 from the respective countries. The increase illustrates the great industrial development which is being witnessed in every part of Canada.

13. Then in the free list, as in the dutiable list, there are a number of articles, like those given below, in which the United States is a larger seller to Canada than the United Kingdom:—Seeds, fire bricks, clays, cotton waste, cocoa nut and palm oil, duck (for belting and hose), drugs, dyes, &c., fishing nets, &c., glove fasteners, hatters' bands, metals, iron and steel manufactures, newspapers and magazines, rags, resin, surgical and dental instruments, binder twine, paintings, &c. Great Britain only sent goods of these classes of the value of \$4,895,900, as against \$15,323,900 from the United States, of which drugs and dyes, seeds, binder twine and manufactures of iron and steel amounted to nearly \$12,000,000, as compared with about \$3,500,000 in 1897. It is hardly necessary to state that the free list is open to all countries alike, and that there are no restrictions.

14. The following articles on the free list come in greater quantities from or through the United Kingdom:—Diamonds, wool, undressed hemp, cotton yarn, No. 40 and finer, jute cloth as from the loom, jute, flax or hemp yarn, plain, dyed, &c., articles for the army and navy, green coffee and tea, salt, noils, &c. Such imports from Great Britain were valued at \$3,884,100, as compared with \$907,900 from the United States. The figures in this and the two preceding paragraphs account for the bulk of the duty-free imports from the two countries.

15. This analysis of the exports of the United States to Canada, and the deduction from the total figures of the portion of the trade in which the United Kingdom, for the reasons given, could not very well hope to compete, serve to explain the considerable disparity between the imports, both dutiable and free, from the two countries. It is a question, however, whether but for the preferential tariff, the dutiable imports from the United Kingdom, in view of the falling off between 1887 and 1897, and of the intensity of the competition of the present day, would have increased as they have done between 1897 and 1902.
